Ultra High Frequency Transistor Array

Features

- This Circuit is Processed in Accordance to MIL-STD-883 and is Fully Conformant Under the Provisions of Paragraph 1.2.1.
- NPN Transistor (f_T) 8GHz (Typ)
- NPN Current Gain 40 (Min)
- NPN Early Voltage (V_A) 20 (Min)
- Noise Figure (50Ω) at 1.0GHz 3.5dB (Typ)
- Collector-to-Collector Leakage. <1pA (Typ)
- Complete Isolation Between Transistors
- Pin Compatible with Industry Standard 3XXX Series

Applications

- VHF/UHF Amplifiers
- VHF/UHF Mixers
- IF Converters
- Synchronous Detectors

Description

The HFA3127/883 is an Ultra High Frequency Transistor Array fabricated on the Intersil Corporation complementary bipolar UHF-1 process. This array consists of five dielectrically isolated transistors on a common monolithic substrate. The high f_T (8GHz) and low noise figure (3.5dB) of these transistors make them ideal for high frequency amplifier and mixer applications.

The HFA3127/883 is an all-NPN array. Access is provided to each of the terminals of the individual transistors for maximum application flexibility. The monolithic construction of the array provides close electrical and thermal matching of the five transistors.

SMD 5962-9474901MEA version is also available from Intersil Corporation.

NOTES:

1. Index area: A notch or a pin one identification mark shall be located adjacent to pin one and shall be located within the shaded area shown. The manufacturer's identification shall not be used as a pin one identification mark.
2. The maximum limits of lead dimensions b and c or M shall be measured at the centroid of the finished lead surfaces, when solder dip or tin plate lead finish is applied.
3. Dimensions b1 and c1 apply to lead base metal only. Dimension M applies to lead plating and finish thickness.
4. Corner leads (1, N, N/2, and N/2+1) may be configured with a partial lead paddle. For this configuration dimension b3 replaces dimension b2.
5. This dimension allows for off-center lid, meniscus, and glass overrun.
6. Dimension Q shall be measured from the seating plane to the base plane.
7. Measure dimension S1 at all four corners.
8. N is the maximum number of terminal positions.
9. Dimensioning and tolerancing per ANSI Y14.5M - 1982.
10. Controlling dimension: INCH.
