**DESCRIPTION**

The AQW414S is a single pole single throw (SPST), normally close (NC), Mos Relay. The relay can control AC or DC loads currents up to 130 mA, with a supply voltage up to 400 V. The device is packaged in a 8 pin SO package. This package offers an insulation dielectric withstand of 1500 VAC<sub>RMS</sub>.

The coupler consists of a AlGaAs LED that is optically coupled to a dielectrically isolated photodiode array which drives two series connected high voltage MOS transistors. The typical ON-Resistance is 40Ω at 25 mA and is linear up to 50mA. The incremental resistance drops to less than 40Ω beyond 50 mA while reducing internal power dissipation at high load currents.
