## MAIN PRODUCT CHARACTERISTICS

Where EMI filtering in ESD sensitive equipment is required:

- Mobile phones and communication systems
- Computers, printers and MCU Boards

## DESCRIPTION

The EMIF06-10006F1 is a highly integrated devices designed to suppress EMI/RFI noise in all systems subjected to electromagnetic interferences. The EMIF04 flip-chip packaging means the package size is equal to the die size.
This filter includes an ESD protection circuitry which prevents the device from destruction when subjected to ESD surges up 15 kV . This device includes four EMIF filters and 4 separated ESD diodes.

## BENEFITS

- EMI symmetrical (I/O) low-pass filter
- High efficiency in EMI filtering
- Very low PCB space consuming: $2.92 \mathrm{~mm} \times 1.29 \mathrm{~mm}$
- Very thin package: 0.65 mm
- High efficiency in ESD suppression (IEC61000-4-2 level 4)
- High reliability offered by monolithic integration
- High reducing of parasitic elements through integration and wafer level packaging.

## COMPLIES WITH THE FOLLOWING STANDARDS:
