

### Innovative and Powerful Features!

- ◆ For worldwide Operation – with ultra-wide Input Range from 100 to 550VAC
- ◆ For Single- and 3 Phase Networks
- ◆ Robust Design- qualified for harsh Industrial Environments
- ◆ Industrial Operating Temperature Range: –25°C to +70°C
- ◆ Power Good Signal
- ◆ Indefinite Short Circuit, Overvoltage and Overtemperature Protection
- ◆ Wall Mounting Option
- ◆ Modular Design with Add-on Modules for:
  - Redundancy Operation
  - DC-UPS
  - Buffer for Power Back-up
- ◆ International Safety Approvals incl. ATEX and Class I, Div.2 Certification
- ◆ 3 Year Warranty

The successful TSP series of high performance DIN-Rail Power Supplies has been expanded with 3 additional models which features an ultrawide input range of 85-132/230-550VAC. With this input voltages the power supplies can be used in almost all single- and 3 phase power networks worldwide.

A high, continuously available power reserve guarantees reliable start-up of loads with high inrush currents. Excellent electrical specifications and high immunity against electrical disturbances makes these compact modules the best choice to power sensitive loads in industrial process control systems, machine tools or any other demanding industrial application. The power supplies complies also with the new EMC standard for Industrial environments, IEC/EN 61204-3.

3 Add-on Modules for extra functions offer a great flexibility in system applications. A module for redundant operation with true power sharing is available. With the Battery Controller module the power supplies can be extended to a perfect DC-UPS system. The Buffer module provides power back-up up to 4 seconds without the need of any batteries. Easy and vibration proof installation with pluggable screw terminal block and snap-on mounting on DIN-rails.

Models			
Model No.	Output Voltage (Vnom)	*Output Current (Imax)	Output Power (Pmax)
TSP 180–124WR	24 VDC (adjustable 24 - 28 VDC)	7.5 A	180 W
TSP 360–124WR		15.0 A	360 W
TSP 600–124WR		25.0 A	600 W

\* Max. current at nominal output voltage and operating temperature up to 40°C max.

### Input Specifications

Applicable 3-Phase Networks	– TN, TT: 500 VAC Star configuration (EN60950+UL508) 500 VAC Delta (UL508 only)
	– IT: 400 VAC Delta (IEC-62103) 230 VAC Delta (IEC-60950) 500 VAC UL508 only
Input voltage ranges	85–132 / {187–264 / 323–550 autorange} selectable by manual slide switch
Harmonic limits	EN 61000-3-2, Class A (for limited output power)
Holdup time	20 ms min. (full load 230 - 500 VAC)
Inrush current	115 VAC      230 VAC TSP 180-124VWR      t.b.a      < 23 A TSP 360-124VWR      t.b.a      < 46 A TSP 600-124VWR      t.b.a      < 50 A
Efficiency	88% typ.

### Output Specifications

Output voltage adj. range	24 – 28 VDC
Regulation	– Input variation      0.5 % max. – Load variation (10–100 %)      0.5 % max. – Load variation (10–100 %) parallel mode      2.0%
Ripple and Noise (20MHz Bandwidth)	100 mV pk-pk typ. (150 mV pk-pk max. at I <sub>max</sub> )
Electronic short circuit protection	current limitation at 125% of I <sub>max</sub> . constant current, automatic recovery
Output overvoltage protection	34 V
Overload protection	electronic overload protection
Overtemperature protection	switch off at overtemperature, automatic restart
Status indicator	dual color LED (green: DC ok, red: DC off)
Power-Good signal	– trigger threshold: 18 - 22V – relay output      DC OK = contact closed (rated: 30VDC / 1.0A)
Max. capacitive load	unlimited

### General Specifications

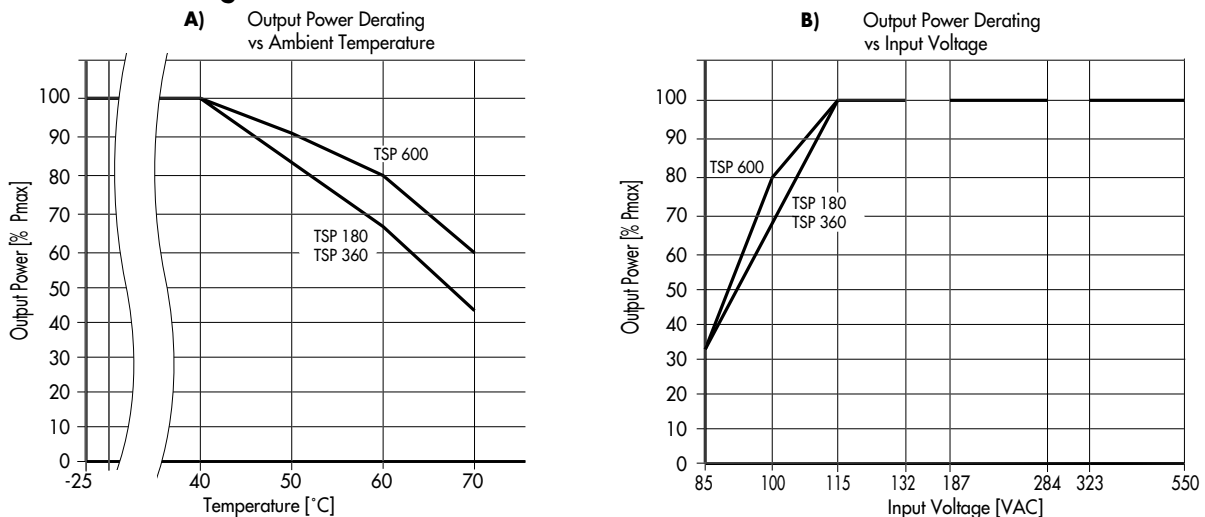

Operating temperature range	– 25°C...+70°C max. (–13°F...+158°F) (for derating see graph A on page 4)
Cooling	convection cooling, no internal fan
Storage temperature	–25 °C...+85 °C (– 13°F...+185°F)
Humidity (non condensing)	95 % rel. H max.
Pollution degree	2
Temperature coefficient	0.02 %/K
Reliability, calculated MTBF	>350'000h in acc. to IEC 61709
Remote On/Off	by ext. contact. DC on: -S contact open DC off: -S connectetd via 1Kohm to -Vout

All specifications valid at nominal input voltage, full load and +25°C after warm-up time unless otherwise stated.

Environment	<ul style="list-style-type: none"> <li>- Vibration acc. IEC 60068-2-6;</li> <li>- Shock acc. IEC 60068-2-27</li> </ul>	3 axis, sine sweep, 10-55 Hz, 1g, 1oct/min 3 axis, 15 g half sine, 11 ms
Enclosure material		aluminium (chassis) / zinc plated steel (cover)
Mounting	<ul style="list-style-type: none"> <li>- DIN-rail mounting</li>   <li>- Wall mounting (option)</li> </ul>	for DIN-rails as per EN 50022-35x15/7.5 (snap-on with selflocking spring) with <b>wall mounting bracket</b> - see page 10
Connection		detachable screw terminals (plugs included) 2 terminals per output

**Output Power Derating**

All specifications valid at nominal input voltage, full load and +25°C after warm-up time unless otherwise stated.

**TSP-REM360 Redundancy Module**

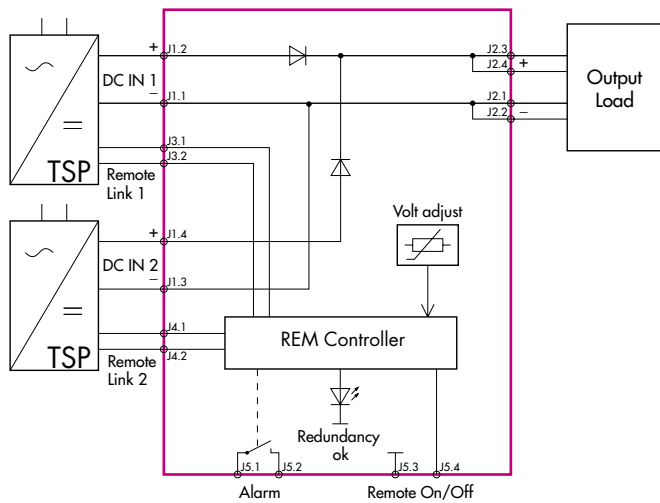

With this module and two power supplies of the TSP series (180 and 360W models) a highly reliable, true redundant power system can be configured without any additional components. This module enforces the equivalent sharing of the output current by each power supply. The system is fully redundant and provides the output power even if one power supply has completely failed e.g. by short circuit on the output. In the event of either, one power supply failing or being disconnected, the second unit will automatically supply the full current to the load. The redundancy of the system is monitored and if lost, indicated by an alarm output. The inputs are hot swappable and can be loaded up to 15A each.

**Models**

Order code (includes terminal plugs)	Input	Max Power per Input	Output Voltage adjust	Output Power max.
<b>TSP-REM360</b>	2 x 24 VDC 2 x Control input	2 x 360 W	<b>24 VDC</b> (24 - 27 VDC)	<b>360 W</b>

**Function Diagram**

**Connector Positions**

**Specifications**

Operating temperature	- 25°C...+70°C max. (-13°F...+158°F) derating above 40°C (104°F): 1.5%/K
Electromagnetic compatibility	in correspondence to connected units (no internal switching device)
Redundancy OK signal (Alarm)	trigger threshold at 18...22VDC, contact closed if one or both inputs failed
Remote link cable (0.5m)	2 cables included with TSP-REM360 module
Remote On/Off	by ext. contact: contact open = On, contact closed = Off
Dimensions	see page 7

All specifications valid at nominal input voltage, full load and +25°C after warm-up time unless otherwise stated.

**TSP-BFM24 Buffer Module**

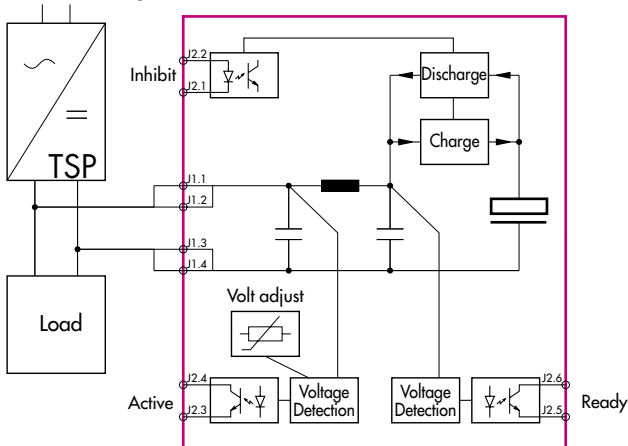

The TSP-BFM24 Buffer Module will hold the output voltage of a 24VDC power supply after brown outs or voltage dips of up to ten full 50Hz cycles. During this buffer period no deterioration of the 24VDC output voltage will occur. For many applications this buffer module is an ideal and cost effective alternative to a battery based backup system. The buffer module consists of a large bank of capacitors. When the power supply is switched on, the buffer capacitors will be charged. This will take approximately 30 second and an opto-coupler signal is indicating the „READY“ condition. When a power fail occurs, the capacitor bank is discharged, maintaining the output of the buffer module at its nominal voltage. This condition is indicated by an „POWER FAIL“ signal. The hold up time is typically 200ms at 25A and 4 seconds typically at 1,2A. After 4 seconds the buffer device will switch off the output voltage. The operation modes of the module are indicated by a LED on the front panel also. The big advantage of this buffer solution is, that it is fully maintenance free and its storage capability does not deteriorate over the live time of the product.

**Models**

Order code (includes terminal plugs)	Operating Voltage Range	Buffer Time	Output Power max.
TSP-BFM24	24...28VDC	200ms typ. @ 25A max. 4.0 s max. @ 1.2A	600 W

Function Diagram

Connector Positions

**Specifications**

Operating temperature	- 25°C...+70°C max. (-13°F...+158°F) derating above 40°C (104°F): 1.5%/K
Electromagnetic compatibility	in correspondence to connected units (no internal switching device)
Buffer voltage	adjustable, >1V below input voltage, min. 22VDC
Charging	0.6A max. / 30s max.
Status signals	Buffer Active , Buffer Ready (optocoupler output) and dual colour LED for status indication
Inhibit	optocoupler input: 35V max. <5mA
Dimensions	see page 7

All specifications valid at nominal input voltage, full load and +25°C after warm-up time unless otherwise stated.

**TSP-BCM24 Battery Controller Module**

This module provides a professional battery management system to charge and monitor an external lead-acid battery. Together with a power supply of the TSP series a perfect DC-UPS system can be configured. The connected battery will be charged and held in charged mode by the power supply. In case of a mains power failure the battery will supply the output power until the battery is discharged. As a consequence, the output voltage of the system is equivalent to the battery voltage. To avoid overcharging the battery, an external temperature sensor adjusts the battery voltage automatically to the required end of charge voltage. By this, the battery life time can be extended.

The battery is protected against deep discharge. Mains power and the battery status are monitored regularly and failures indicated by corresponding LED's and alarm outputs. The module provides also an external On/Off input to switch-off both, power supply and battery.

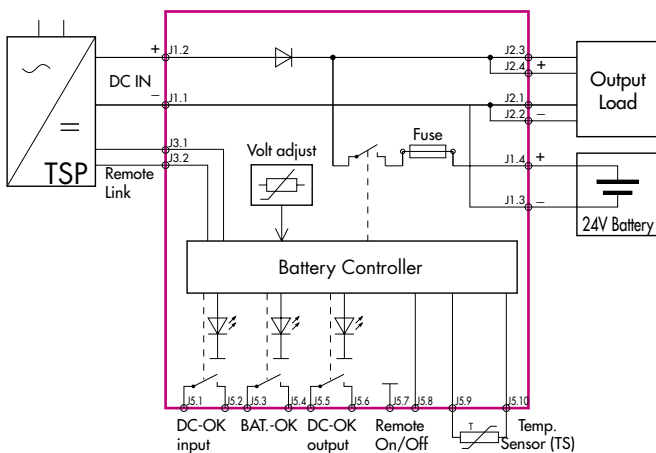

**Models**

Order code (includes terminal plugs)	Inputs	Input Power max	Output Voltage nom.	*Output Power max.
<b>TSP-BCM24</b>	24 VDC Power Supply and 24 VDC Battery	360 W	<b>24 VDC</b>	<b>360 W</b>

\*reduce max. output current by battery charging current

**Function Diagram**

**Connector Positions**

**Specifications**

Operating temperature	- 25°C...+70°C max. (-13°F...+158°F) derating above 40°C (104°F): 1.5%/K
Electromagnetic compatibility	in correspondence to connected units (no internal switching device)
Battery protection	over voltage, deep discharge, short circuit- and revers connection (built-in fuse)
Status signals	DC-OK input, DC-OK output, BAT OK all relay contact closed at status OK
Rating per relay contact	30 VDC / 1.0 A max.
Remote link cable (0.5m)	1 cable included with TSP-BCM24 module
Remote On/Off	by ext. contact: contact open = On, contact closed = Off
Dimensions	see page 7

All specifications valid at nominal input voltage, full load and +25°C after warm-up time unless otherwise stated.
