

M62498FP

DIGITAL SOUND CONTROLLER WITH SURROUND

DESCRIPTION

The M62498FP is an optimum digital sound controller IC for home audio.

It has a 5ch input selector, input volume, surround(3 variation), tone control(3 band), loudness and 2ch master volume.

It can control all of these functions with serial data.

FEATURES

- Built-in 5ch input selector.
- Built-in input volume (2dB step/3bit)
- IC for Dolby-pro-logic Interface
- Built-in Surround (ON/OFF, High/Middle/Low(3 variation))
- Tone control (Bass/Mid/Treble)
- Built-in Loudness.
- Main Volume (36 step (0 to -80dB, - •)
- Microcomputer Interface

PACKAGE

Outline 42P2R-A

0.8mm Pitch 450mil SSOP
(8.4mm x 17.5mm x 2.0mm)

RECOMMENDED OPERATING CONDITIONS

Supply voltage rangeVcc= 4.5~5.5 Rated supply voltage.....Vcc=5V

DIGITAL SOUND CONTROLLER WITH SURROUND

PIN DESCRIPTION

Pin No.	Symbol	Function
1	REF IN	Input pin of the reference Amp.
2	REF OUT	Output pin oh the reference Amp.
3,4,5,6,7, 36,37,38,39,40	IN 1A,1B,1C,1D,1E 2A,2B,2C,2D,2E	Input pin of the input selector Ch1 and Ch2
8,35	INVOL OUT1,2	Output pin of the input volume 1 and 2
9,34	VSELA IN1,2/REC-C1,2	Input pin of the volume input selector A1 and A2 /Output pin of the REC-C1 and 2
10,33	VSELA OUT1,2	Capacitor connection pin for the volume changing noise reduction
11,32	LOUD1,2	Frequency characteristic setting pin in the loudness part
12,31	BI1,2	Frequency characteristic setting pin in the tone control(Bass).
13,30	BO1,2	
14,29	MI1,2	Frequency characteristic setting pin in the tone control(Mid).
15,28	MO1,2	
16,27	TRE1,2	Frequency characteristic setting pin in the tone control(Treble).
17,26	VSELB OUT1,2	Output pin of the volume input selector B1 and 2
18,25	VOL IN1,2	Input pin of the main volume
19,24	VOL OUT1,2	Output pin of the main volume
20	VCC	The power supply
21	DATA	Input pin of the serial data
22	CLOCK	Clock input pin for the serial data forwarding
23	GND	GND
41	REC-B2/SUR1	Output pin of the REC-B2/Device connection pin for the surround external parts
42	REC-B1/SUR2	Output pin of the REC-B1/Device connection pin for the surround external parts

M62498FP

DIGITAL SOUND CONTROLLER WITH SURROUND

FUNCTION DESCRIPTION

(1) Main volume

This IC has 2 system independence electron volume of low warp percentage and low noise.
0dB~ -∞ dB attenuation quantity can be set with 36 steps(0dB~ -44dB:2dB step, -44dB~ -76dB:4dB step, -77dB ~ -80dB:1dB step).

The attenuation quantity to 0~ -16dB can be set in A1 Vol.

The attenuation quantity to 0~ -64dB can be set in B1 Vol.They are possible to control.

Equivalent circuit of MAIN VOLUME block

(2) Input selector, Input volume

This IC has 5 input selector of 2ch and Input volume of 2ch for Input TRIMMER.

The input selector D, E input is either of -8 dB of 0dB/ a choice in the input level with ATT SW.

The input volume of 0~-14dB can be set with the 2 dB step.

Note1) When inputting a signal above the power supply voltage in D, E input choice, make ATT SW ON.

Note2) The setting of ATT SW changes the input resistance of D, E input like the following.

ATT -8dB of D,E input setting: 20kohm(TYP value)
0dB setting : 60kohm(TYP value)

Note3) At the time of input selector A~C, E or ALL OFF D input ATT SW becomes -8dB setting.

At the time of input selector A~D or ALL OFF D input ATT SW becomes -8dB setting.

Note4) This SW is for the gain adjustment in 0 dB setting in the D, E input ATT.

3-4 Treble (Cut)

<Curve of characteristics>

M62498FP

DIGITAL SOUND CONTROLLER WITH SURROUND

(4) Equivalent circuit of Vocal cut

This IC incorporates the circuit which realizes a vocal cut function simply by lowering gain in the area using the mid circuit of the tone control.

But be careful because vocal cut ON setting, the mid of the tone control can not used.

At vocal cut ON setting, the frequency characteristic can be set like the following, by the resistance of putting outside: The fixed number of R1 and C1, C2.

<CHARACTERISTIC CURVE>

1. Vocal cut characteristic edition

$R=3\text{KW}, C1=C2=0.012\mu\text{F}$

$f_0=550\text{Hz}$
 $Gv=-30\text{dB}$

2. Tone control mid characteristic edition

$R=10\text{KW}, C1=C2=6800\text{pF}$

$f_0=530\text{Hz}$
 $Gv=-20\text{dB}$

(5) LOUDNESS

The diagram illustrates the signal path for the Loudness Part. It begins with an 'A VOL input selector' which can route the signal to either a '0dB~ -16dB: 2dB step' input or a 'LOUDNESS SW' input. The 'LOUDNESS SW' input is part of a 'LOUDNESS PART' block, which contains a 'LOUD1,2 11,32pin' component. The signal then passes through a 'Tone & Surround block'. Following this, it goes through a 'B VOL input selector' which can route the signal to either a 'VSELB OUT1,2 17,26pin' input or a 'VOL IN1,2 18,25pin' input. The 'VOL IN1,2 18,25pin' input is connected to a 'VOL OUT1,2 19,24pin' output stage, which is a variable gain amplifier. The output stage has three gain settings: '0dB~ -28dB:2dB step', '-28dB~ -60dB:4dB step', and '-61dB~ -64dB:1dB step'.

(6)Equivalent circuit of surround block

M62498FP

DIGITAL SOUND CONTROLLER WITH SURROUND

APPLICATION EXAMPLE

(1) Surround of outside setting (for Dolby-Pro-logic)

<"D54=1"--->SW41, 42 setting = B fixation.>

But, in case of this specification inside surround can not be used.

M62498FP

DIGITAL SOUND CONTROLLER WITH SURROUND

(2) Surround of outside non setting (for Dolby-Pro-logic)

<"D54=0"--->SW41, 42 setting = A fixation, Volume input selector A setting=A fixation.>
