

H7905AE

H7905BE

3-TERMINAL NEGATIVE VOLTAGE REGULATOR

Description

The H7905_E series of three-terminal negative regulators are available in the TO-220AB package. They can provide local on-card regulation, eliminating the distribution problems associated with single point regulation; furthermore, having the same voltage options as the H7905_E positive standard series, they are particularly suited for split power supplies. If adequate heat sinking is provided, the H7905_E series can deliver an output current in excess of 1A although designed primarily as fixed voltage regulators, these devices can be used with external components to obtain adjustable voltage and currents.

Absolute Maximum Ratings (Ta=25°C)

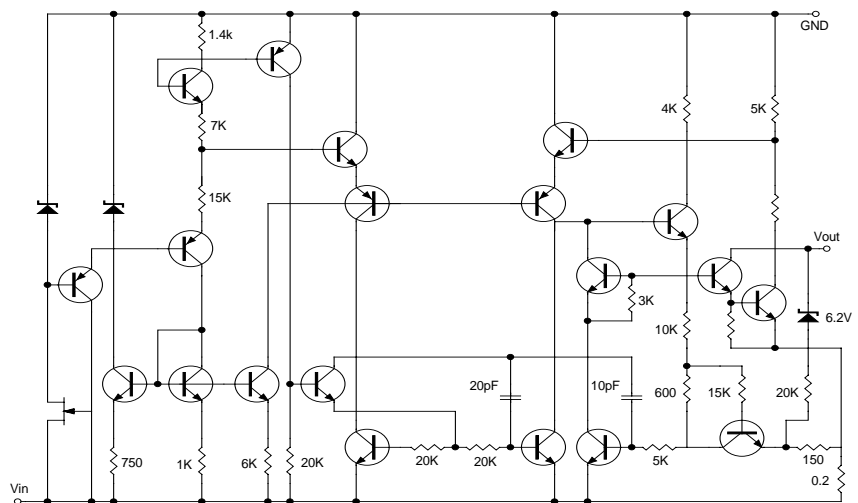

- Input Voltage..... -35 V
- Total Power Dissipation..... Internally limited
- Operating Junction Temperature..... 0 °C to +125 °C
- Maximum Junction Temperature..... 125 °C
- Storage Temperature Range..... -55 °C to +150 °C
- Lead Temperature (Soldering 10S)..... 230 °C

Typical Application

Note:
 By pass Capacitors are recommended for optimum stability and transient response and should be locate as close as possible to the regulator.

Schematic Diagram

Electrical Characteristics

$V_{in} = -10V$, $I_o = 500mA$, $C_{in} = 2.2\mu F$, $C_{out} = 1\mu F$, $0^\circ C \leq T_j \leq 125^\circ C$ (unless otherwise noted)

- Notes: 1.Dimension and tolerance based on our Spec. dated Sep. 07,1997.
 2.Controlling dimension: millimeters.
 3.Maximum lead thickness includes lead finish thickness, and minimum lead thickness is the minimum thickness of base material.
 4.If there is any question with packing specification or packing method, please contact your local HSMC sales office.

Material:

- Lead: 42 Alloy ; solder plating
- Mold Compound: Epoxy resin family, flammability solid burning class: UL94V-0
