The TC74HC7240A/7244A are high speed CMOS OCTAL BUS BUFFERs with silicon gate C²MOS technology.

They achieve the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation.

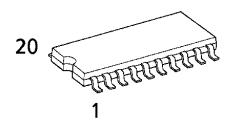

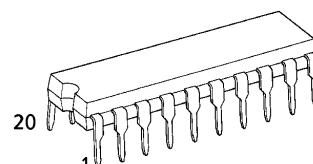

The TC74HC7240A/7244A have same pin configuration and function as the TC74HC240A/244A. And they have a hysteresis characteristics with each input, so TC74HC7240A/7244A can be used as a line receiver, etc.

They have two active low output enables.

All inputs are equipped with protection circuits against static discharge or transient excess voltage.
