- Note 5: Background colour of the LCD changes depending on temperature. Between 40-50°C optical characteristics of the LCD like contrast and viewing angle change but the display remains readable.
 Note 6: Higher starting voltage of CFL and higher LCD driving voltage are needed while operating at 0°C. The lifetime of CFL will be reduced at 0°C
 Note 7: Storage at -20°C < 48 hr, T_a at 60°C < 168 hr
 Note 8: Measurement after 10 minutes of CFL operating. Brightness control100%
 Note 9: Starting discharge voltage is increased when LCM is operating at lower temperature. Please check the characteristics of inverter before applying.
