Coil Components (SMD)

MC-200SC and MC-200SD Series

■Features

1.Excellent High Frequency Characteristics

Insertion loss: 0.6 dB TYP. Phase balance: ±3deg TYP.

2. Highly Reliable Design

PPS resin is used for the exterior cladding of the cover, glass epoxy substrate is used for the board material, and solder plating is used for the electrodes. All these factors contribute to excellent mechanical strength, heat resistance, and soldering qualities

3. Suited to Automatic Mounting

Embossed tape packaging permits automatic mounting. (Individual delivery can also be accommodated.)

■Product Specifications

Ratings C	Frequency range (Note) Characteristic impedance (Note) Maximum Input Power	30 to 370 MHz 50 ohms, 75 ohms 0.5 W	Operating temperature range Operating relative humidity	-10℃ to +65℃ 95% Max.

Note: The frequency range and the characteristic impedance will differ depending on the products.

Item	Standard	Conditions		
1.Vibration		Frequency of 10 to 2000 Hz, overall amplitude of 1.52 mm acceleration of 98 m/s² for 4 hours in each of 3 directions		
2.Shock	No damage, cracks, or parts dislocation	Acceleration of 294 m/s², sine half-wave waveform, 3 cycles in each of the 3 axis		
3.Temperature cycle	No damage, cracks, or parts dislocation	(-60 to 55°C: 30 min. → 20 to 35°C: 15 min. → 125 to 128°C: 30 min. → 20 to 35°C: 15 min.) for 100 cycles		
4.Corrosion resistance	No serious corrosion	Exposed to 5% salt water solution for 48 hours		

[●]The test method conforms to MIL-STD-202.

Cover	PPS			

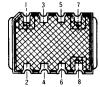

■Ordering Information

MC - 2 0 1 S C

1 Series Name: MC	4 Suffix
Number of Divisions Indicated by number of divisions of output.	S : SMT type
Phase Difference Indicated by phase difference of output. 0:0° 1:90°	Characteristic Impedance C: 75 ohms D: 50 ohms

■External Dimensions

The contact numbers are common for both the 0° type and the 90° type.

Note 1: The insertion loss of the 2-way 90° type is the average output of the 0° port and the -90° port minus 3 dB coupling. Note 2: When ordering items with embossed tape packaging, affix (06) to the end of the product number. One reel contains 500 pieces.

■Function Diagram

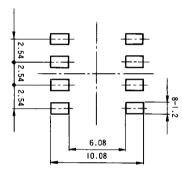

Pins 2, 3, 4, 5, and 6 are ground.

Pins 3, 4, 7, and 8 are ground.

■PCB Mounting Pattern

Please apply resist processing to the area around the electrode pads.

■Precautions

1.Soldering (1)Recommended temperature profile	300 210-230°C 130 100		
	Preheating Soldering Slow cooling A0 to 120 s 20 to 60 s Natural cooling for 1 minute Min. Note 1: Up to 2 cycles of reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle. Note 2: The temperature profile indicates the board surface temperature at the point of contacts with the connector terminals (for surface mounted receptacle).		
(2)Recommended manual soldering	Manual soldering: 260°C for 10 seconds		
(3)Recommended screen thickness	0.15 mm		
2.Product Storage	 ①After opening the package reseal promptly or store in a desiccator with a desiccant. ②Store in a place that is not exposed to harmful gases which include sulfur or chlorine, etc. ③Use within one year of delivery.
