Thick film rectangular

MCR50 (5025 size: 1/2W)

Features

- 1) Made of same material as the general purpose chip resistors (MCR10 / 18).
- 2) Highly reliable chip resistor

Ruthenium oxide dielectric offers superior resistance to the elements.

- 3) Electrodes not corroded by soldering Suitable for re-flow soldering.
- 4) ROHM resistors have approved ISO-9001 certification. Design and specifications are subject to change without notice. Carefully check the specification sheet supplied with the product before using or ordering it.

●Ratings

Item	Conditions	Specifications
Rated power	Power must be derated according to the power derating curve in Figure 1 when ambient temperature exceeds 70°C. 100 80 90 60 20 0 AMBIENT TEMPERATURE (°C) Fig.1	0.5W (1 / 2W) at 70°C
Rated voltage	The voltage rating is calculated by the following equation. If the value obtained exceeds the limiting element voltage, the voltage rating is equal to the maximum operating voltage.	Limiting element voltage 200V
Nominal resistance	See <u>Table 1</u> .

•Before using components in circuits where they will be exposed to transients such as pulse loads (short-duration, high-level loads), be certain to evaluate the component in the mounted state. In addition, the reliability and performance of this component cannot be guaranteed if it is used with a steady state voltage that is greater than its rated voltage.
