Description

M/A-COM's MAAMSS0040 is a GaAs PHEMT MMIC amplifier in a lead-free surface mount SOIC-16 package. The MMIC design is configured as a pair of cascode PHEMT amplifiers for broadband performance. It is designed for integration in a 75ohm push-pull low distortion amplifier circuit. The device is ideally suited for use in CATV, DBS, and DTV applications where low noise figure, low distortion and high linearity are required.
