## DATA SHEET

## BZV55 series Voltage regulator diodes

## Voltage regulator diodes

## FEATURES

- Total power dissipation: max. 500 mW
- Two tolerance series: $\pm 2 \%$, and approx. $\pm 5 \%$
- Working voltage range: nom. 2.4 to 75 V (E24 range)
- Non-repetitive peak reverse power dissipation: max. 40 W .

## APPLICATIONS

- Low voltage stabilizers or voltage references.

## DESCRIPTION

Low-power voltage regulator diodes in small hermetically sealed glass SOD80C SMD packages. The diodes are available in the normalized E24 $\pm 2 \%$ (BZV55-B) and approx. $\pm 5 \%$ (BZV55-C) tolerance range. The series consists of 37 types with nominal working voltages from 2.4 to 75 V .

The cathode is indicated by a yellow band.
Fig. 1 Simplified outline (SOD80C) and symbol.

## LIMITING VALUES

In accordance with the Absolute Maximum Rating System (IEC 60134).

| SYMBOL | PARAMETER | CONDITIONS | MIN. | MAX. | UNIT |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathrm{I}_{\mathrm{F}}$ | continuous forward current |  | - | 250 | mA |
| $\mathrm{I}_{\text {ZSM }}$ | non-repetitive peak reverse current | $\mathrm{t}_{\mathrm{p}}=100 \mu \mathrm{~m} ;$ square wave; <br> $\mathrm{T}_{\mathrm{j}}=25^{\circ} \mathrm{C}$ prior to surge | see Tables 1 and 2 | A |  |
| $\mathrm{P}_{\text {tot }}$ | total power dissipation | $\mathrm{T}_{\text {amb }} \leq 50^{\circ} \mathrm{C} ;$ note 1 | - | 400 | mW |
|  | tie-point $\leq 50^{\circ} \mathrm{C} ;$ note 1 | - | 500 | mW |  |
| $\mathrm{P}_{\text {ZSM }}$ | non-repetitive peak reverse power <br> dissipation | $\mathrm{t}_{\mathrm{p}}=100 \mu \mathrm{~s} ;$ square wave; <br> $\mathrm{T}_{\mathrm{j}}=25^{\circ} \mathrm{C}$ prior to surge; see Fig.3 | - | 40 | W |
| $\mathrm{~T}_{\text {stg }}$ | storage temperature |  | -65 | +200 | ${ }^{\circ} \mathrm{C}$ |
| $\mathrm{T}_{\mathrm{j}}$ | junction temperature |  | -65 | +200 | ${ }^{\circ} \mathrm{C}$ |

## Note

1. Device mounted on a ceramic substrate of $10 \times 10 \times 0.6 \mathrm{~mm}$.

Voltage regulator diodes

| Qualification | This data sheet contains data from the preliminary specification. <br> Supplementary data will be published at a later date. Philips <br> Semiconductors reserves the right to change the specification without <br> notice, in order to improve the design and supply the best possible <br> product. |  |
|  | Production | This data sheet contains data from the product specification. Philips <br> Semiconductors reserves the right to make changes at any time in order <br> to improve the design, manufacturing and supply. Changes will be <br> communicated according to the Customer Product/Process Change <br> Notification (CPCN) procedure SNW-SQ-650A. |

## Notes

1. Please consult the most recently issued data sheet before initiating or completing a design.
2. The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL http://www.semiconductors.philips.com.

## DEFINITIONS

Short-form specification - The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

Limiting values definition - Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.
Application information - Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

## DISCLAIMERS

Life support applications - These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.
Right to make changes - Philips Semiconductors reserves the right to make changes, without notice, in the products, including circuits, standard cells, and/or software, described or contained herein in order to improve design and/or performance. Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no licence or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
