3.GENERAL DATA

The specifications are applied to the following TFT-LCD module with Back-light unit.

(1) Part Name	TX09D50VM1CDA
(2) Module Dimensions	64.0(W)mm x 86.0(H)mm x (7.17)(D)mm
(3) Effective Display Area	53.64(W)mm x 71.52(H)mm (Diagonal:9cm)
(4) Dot Pitch	0.0745mm x 3(R,G,B)(W) x 0.2235(H)mm
(5) Resolution	240 x 3(R,G,B)(W) x 320 (H) dots
(6) Color Pixel Arrangement	R,G,B Vertical stripe
(7) LCD Type	Transmissive Color TFT LCD (Normally White)
(8) Display Type	Active Matrix
(9) Number of Colors	262k Colors (R,G,B 6 Bit Digital each)
(10) Backlight	Light Emitting Diode (LED) x 6
(11) Weight	T.B.D
(12) Interface	40 pin C-MOS
(13) Power Supply Voltage	3.3V only (Including Timing controller , LCD and LED Power Unit)
(14) Viewing Direction	6 O'clock (The direction it's hard to be discolored)

Note 6 : IFP Conditions : pulse width ≤ 10 ms and Duty ≤ 5 %

4.2 ENVIRONMENTAL ABSOLUTE MAXIMUM RATINGS

ITEM	OPERATING		STORAGE		REMARKS
	Min.	Max.	Min.	Max.	
Ambient Temperature	(-10°C)	(55°C)	(-20°C)	(60°C)	(Note 2,3,6,7,9)
Humidity	(Note 1)		(Note 1)		Without condensation
Vibration	-	(2.45)m/s ² (0.25G)	-	(11.76)m/s ² (1.2G)	(Note 4,5)
Shock	-	(29.4)m/s ² (3G)	-	(490)m/s ² (50G)	(Note 5,8)
Corrosive Gas	Not Acceptable		Not Acceptable		

Note 1 : $T_a \leq 40^\circ\text{C}$: 85%RH max.

$T_a > 40^\circ\text{C}$: Absolute humidity must be lower than the humidity of 85%RH at 40°C .

Note 2 : For storage condition T_a at $-20^\circ\text{C} < 48\text{h}$, at $60^\circ\text{C} < 100\text{h}$.

For operating condition T_a at $-10^\circ\text{C} < 100\text{h}$

Note 3 : Background color changes slightly depending on ambient temperature.

This phenomenon is reversible.

Note 4 : 5Hz~100Hz(Except resonance frequency)

Note 5 : This LCM will resume normal operation after finishing the test.

Note 6 : The response time will be slower as low temperature.

Note 7 : Only operation is guaranteed at operating temperature. Contrast, response time, another display quality are evaluated at $+25^\circ\text{C}$.

Note 8 : Pulse Width : 10ms

Note 9 : This is panel surface temperature , not ambient temperature.

5. ELECTRICAL CHARACTERISTICS

5.1 ELECTRICAL CHARACTERISTICS OF LCD

10.1 APPEARANCE INSPECTION CONDITION

Visual inspection should be done under the following condition.

- (1) The inspection should be done in a dark room.(More than 1000(lx) and non-directive)
- (2) The distance between eyes of an inspector and the LCD module is 30cm.
- (3) The viewing zone is shown the figure.

Viewing angle $\leq 25^\circ$

Note 1 : Definition of average diameter (D)

Note 2 : Definition of length (L) and width (W)

Note 3 : Definition of dot defect

- (a) Dot Defect : Defect Area > 1/2 dot
- (b) Sparkle mode : Brightness of dot is more than 30% at Black raster.
- (c) Black mode : Brightness of dot is less than 70% at R.G.B raster.
- (d) 1 dot : Defect dot is isolated , not attached to other defect dot.
- (e) N dot : N defect dots are consecutive .
(N means the number of defect dots.)

2 dots defect included defect dot "X" is defined as follows.

Adjacent dots to defect dot "X" :

- (f) Counting definition of adjacent dots(1 sets) : same as 1 dot defect.
- (g) Those wiped out easily are acceptable

11. PRECAUTION IN DESIGN

11.1 PRECAUTIONS AGAINST ELECTROSTATIC DISCHARGE

As this module contains C-MOS LSIs, it is not strong against electrostatic discharge. Make certain that the operator's body is connected to the ground through a wrist band, etc.

And don't touch I/F pins directly.

11.2 HANDLING PRECAUTIONS

- (1) As the adhesives used for adhering upper/lower polarizer's and frame are made of organic substances which will be deteriorated by a chemical reaction with such chemicals as acetone, toluene, ethanol and isopropyl alcohol. The following are recommended for use :

normal hexane

Please contact with us when it is necessary for you to use chemicals other than the above.

- (2) Lightly wipe to clean the dirty surface with absorbent cotton or other soft material like chamois, soaked in the recommended chemicals without scrubbing it hardly.
Always wipe the surface horizontally or vertically. Never give a wipe in a circle. To prevent the display surface from damage and keep the appearance in good state, it is sufficient, in general, to wipe it with absorbent cotton.
- (3) Immediately wipe off saliva or water drop attached on the display area because it may cause deformation or faded color.
- (4) Foggy dew deposited on the surface may cause a damage, stain or dirt to the polarizer.
When you need to take out the LCD module from some place at low temperature for test, etc.
It is required to be warmed them up to temperature higher than room temperature before taking them out.
- (5) Touching the display area or I/F pins with bare hands or contaminating them are prohibited, because the stain on the display area and poor insulation between terminals are often caused by being touched with bare hands.
(Some cosmetics are detrimental to polarizer's.)
- (6) In general, the glass is fragile so that, especially on its periphery, tends to be cracked or chipped in handling. Please not give the LCD module sharp shocks by falling, etc.
- (7) Maximum pressure to the surface must be less than 1.96×10^4 Pa.
And if the pressure area is less than 1cm^2 , maximum pressure must be less than 1.96N.
- (8) Since the metal width is narrow on these locations (see page 9-1/1), please careful with handling.

- (9) Top sheets shall be cleaned gently using a soft cloth such as those used for glasses.
Hard wiping accumulated dust will leave scars on the surface even using a cloth.

11.3 OPERATION PRECAUTION

- (1) Using a LCM module beyond its maximum ratings may result in its permanent destruction.
LCM module's should usually be used under recommended operating conditions shown in chapter 5. Exceeding any of these conditions may adversely affect its reliability.
- (2) Response time will be extremely delayed at lower temperature than the specified operating temperature range and on the other hand LCD's shows dark blue at higher temperature.
However those phenomena do not main defects of the LCD module. Those phenomena will disappear in the specified operating temperature range.
- (3) If the display area is pushed hard during operation, some display patterns will be abnormally display.
- (4) A slight dew depositing on terminals may cause electrochemical reaction which leads to terminal open circuit. Please operate the LCD module under the relative condition of 40°C 85%RH.

11.4 STORAGE

In case of storing LCD module for a long period of time (for instance, for years) for the purpose of replacement use, the following precautions necessary.

- (1) Store the LCD modules in a dark place; do not expose them to sunlight or ultraviolet rays.
- (2) Keep the temperature between -20°C and 60°C at normal humidity.
- (3) Store the LCD modules in the container which is used for shipping from us.
- (4) No articles shall be left on the surface over an extended period of time.

12. DESIGNATION OF LOT MARK

12.1 LOT MARK

Lot mark is consisted of 4 digits for production lot and 5 digits for production control.

Year	Mark
2004	4
2005	5
2006	6
2007	7
2008	8

Month	Jan.	Feb.	Mar.	Apr.	May	Jun.

13. PRECAUTION FOR USE

(1) A limit sample should be provided by the both parties on an occasion when the both parties agree to its necessity.

Judgement by a limit sample shall take effect after the limit sample has been established and confirmed by the both parties.

(2) On the following occasions, the handling of the problem should be decided through discussion and agreement between responsible persons of the both parties.

1) When a question is arisen in the specifications.

2) When a new problem is arisen which is not specified in this specifications.

3) When an inspection specifications change or operating condition change by customer is reported to HITACHI, and some problem is arisen in the specification due to the change.

4) When a new problem is arisen at the customer's operating set for sample evaluation.

(3) Regarding the treatment for maintenance and repairing, both parties will discuss it in six months later after latest delivery of this product.

The precaution that should be observed when handling LCM have been explained above.

If any points are unclear or if you have any requests, please contact with HITACHI.
