AN5422K

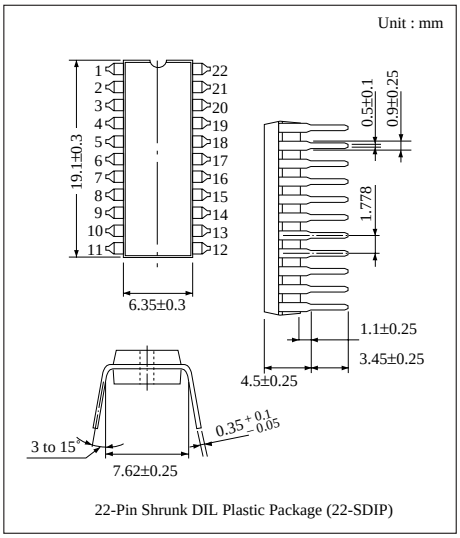
Deflection-Signal-Processing IC for TV/Display

■ Overview

The AN5422K is an integrated circuit for TV/display deflection-signal-processing circuit. Horizontal oscillation frequency is up to 120kHz. The duty of a horizontal output pulse can be changed by the external bias so that the display is designed easily.

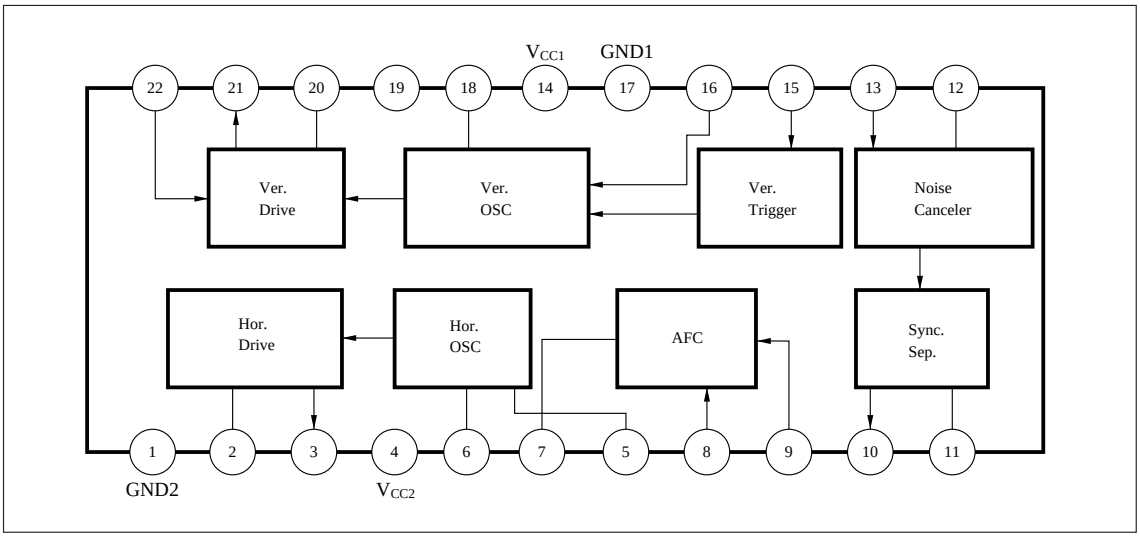
■ Features

- Noise canceller circuit built-in (with lock-out preventive circuit)
- The duty of a horizontal output pulse can be changed by the external bias.
- Horizontal oscillation frequency : max. 120kHz
- X-ray protector built-in (shutdown)
- Vertical drive circuit built-in



22-Pin Shrunk DIL Plastic Package (22-SDIP)

■ Block Diagram



■ Absolute Maximum Ratings (Ta= 25˚C)

Parameter	Symbol	Rating	Unit
Supply voltage	V_{CC}	($V_{14\text{-}17}$) 14.4	V
Supply current	I_{CC}	(I_{14}) 30	mA
		(I_4) 40	
Power dissipation (Ta=70˚C)	P_D	1290	mW
Operating ambient temperature	T_{opr}	– 20 to + 70	˚C
Storage temperature	T_{stg}	– 55 to +150	˚C

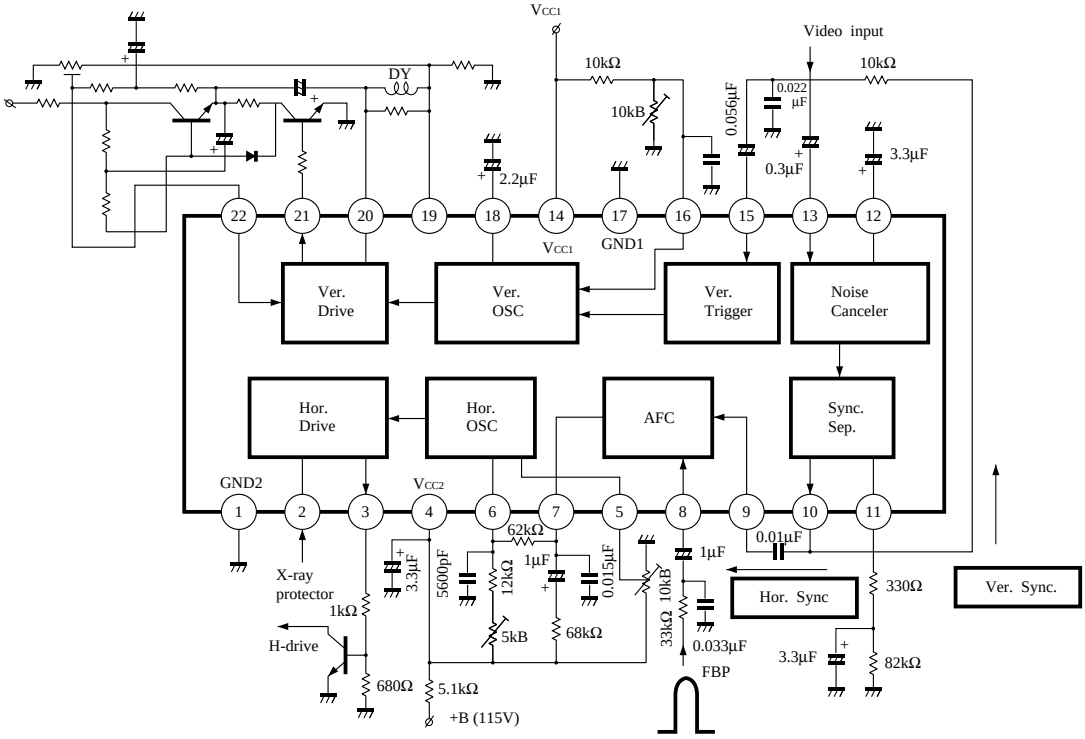
■ Recommended Operating Range (Ta=25˚C)

Parameter	Symbol	Range
Operating supply voltage range	V_{CC}	9.6V to 14.4V

■ Electrical Characteristics (Ta= 25˚C)

Parameter	Symbol	Condition	min	typ	max	Unit
Overvoltage-protective-ciucuit operation-input voltage	$V_{2\text{-}1}$		0.65	0.71	0.76	V
SYNC.SEP horizontal synchronous pulse width	$\tau_{sync\ (1)}$	Video input 1.4$V_{P\text{-}P}$, V_{CC1}=12V	4.4	4.8	5.2	µs
Horizontal AFC horizontal synchronous pulse width	$\tau_{sync\ (2)}$	Video input 1.4$V_{P\text{-}P}$, V_{CC1}=12V	4.5	4.9	5.3	µs
Noise detection sensitivity (1)	e_{n1}	f= 60Hz, 4µs, 0.7V_{PP}	10.5	—	—	V_{PP}
Noise detection sensitivity (2)	e_{n2}	f= 3.58MHz, 1.2V_{PP}	—	—	0.5	V_{PP}
Vertical oscillation frequency	f_{VO}	V_{CC1}=12V	51	55	59	Hz
Vertical output pulse width	τ_{VO}	Free running f_{VO}= 55Hz, V_{CC1}=12V	750	950	1150	µs
Vertical pull-in range	f_{pv}	Input 0.7$V_{P\text{-}P}$, 60Hz, pulse width 200µs	—	35	37	Hz
Horizontal oscillation frequency	f_{HO}	Adjust to f_{HO}=15.75kHz by typical sample	15	15.75	16.5	kHz
Horizontal oscillatin pulse duty	τ_{HO}	Adjust to f_{HO}=15.75kHz by typical sample	30	35	39	%
Horizontal oscillation control sensitivity	β	Change in oscillation frequency when ΔI=±25µA	130	160	190	$\frac{Hz}{\mu A}$
Phase detection sensitivity	µ	V_{CC1}=12V	13	19	25	$\frac{\mu A}{\mu s}$
Horizontal oscillation output pin voltage (H)	$V_{3\text{-}1\ (H)}$		4.1	5.1	6.2	V
Horizontal oscillation output pin voltage (L)	$V_{3\text{-}1\ (L)}$		–1.4	– 0.7	0.3	V

■ Application Circuit



Request for your special attention and precautions in using the technical information and semiconductors described in this material

(1) An export permit needs to be obtained from the competent authorities of the Japanese Government if any of the products or technologies described in this material and controlled under the "Foreign Exchange and Foreign Trade Law" is to be exported or taken out of Japan.

(2) The technical information described in this material is limited to showing representative characteristics and applied circuit examples of the products. It does not constitute the warranting of industrial property, the granting of relative rights, or the granting of any license.

(3) The products described in this material are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances).
Consult our sales staff in advance for information on the following applications:
- Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
- Any applications other than the standard applications intended.

(4) The products and product specifications described in this material are subject to change without notice for reasons of modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.

(5) When designing your equipment, comply with the guaranteed values, in particular those of maximum rating, the range of operating power supply voltage and heat radiation characteristics. Otherwise, we will not be liable for any defect which may arise later in your equipment.
Even when the products are used within the guaranteed values, redundant design is recommended, so that such equipment may not violate relevant laws or regulations because of the function of our products.

(6) When using products for which dry packing is required, observe the conditions (including shelf life and after-unpacking standby time) agreed upon when specification sheets are individually exchanged.

(7) No part of this material may be reprinted or reproduced by any means without written permission from our company.

Please read the following notes before using the datasheets

A. These materials are intended as a reference to assist customers with the selection of Panasonic semiconductor products best suited to their applications.
Due to modification or other reasons, any information contained in this material, such as available product types, technical data, and so on, is subject to change without notice.
Customers are advised to contact our semiconductor sales office and obtain the latest information before starting precise technical research and/or purchasing activities.

B. Panasonic is endeavoring to continually improve the quality and reliability of these materials but there is always the possibility that further rectifications will be required in the future. Therefore, Panasonic will not assume any liability for any damages arising from any errors etc. that may appear in this material.

C. These materials are solely intended for a customer's individual use.
Therefore, without the prior written approval of Panasonic, any other use such as reproducing, selling, or distributing this material to a third party, via the Internet or in any other way, is prohibited.
