NC7SZ38

TinyLogic™ UHS 2-Input NAND Gate (Open Drain Output)

General Description

The NC7SZ38 is a single 2-Input NAND Gate with open drain output stage from Fairchild's Ultra High Speed Series of TinyLogic™. The device is fabricated with advanced CMOS technology to achieve ultra high speed with high output drive while maintaining low static power dissipation over a very broad V_{CC} operating range. The device is specified to operate over the 1.65V to 5.5V V_{CC} range. The inputs and output are high impedance when V_{CC} is 0V. Inputs tolerate voltages up to 6V independent of V_{CC} operating voltage. The open drain output stage will tolerate voltages up to 6V independent of V_{CC} when in the high impedance state.

Features

- Space saving SOT23 or SC70 5-lead package

Note 1: Absolute maximum ratings are DC values beyond which the device may be damaged or have its useful life impaired. The datasheet specifications should be met, without exception, to ensure that the system design is reliable over its power supply, temperature, and output/input loading variables. Fairchild does not recommend operation outside datasheet specifi-

Note 2: Unused inputs must be held HIGH or LOW. They may not float.

 $I_{CCD} = (C_{PD}) \; (V_{CC}) \; (f_{IN}) + (I_{CC} \; static). \label{eq:ccd}$
