The DPF950 is a 950W universal input AC/DC front end power supply in a fully enclosed hot pluggable case with built-in fan, front panel with handle, IEC input connector, on/off switch and DIN output signal connector. Providing dual 48V and 5V outputs with a full set of status signals, the DPF950 is designed as a slot-in front end for distributed power systems. The DPF950 provides 950W of output power and is fully compliant with EN61000-3-2. Standard features include current sharing and full protection against overvoltage, overload and short circuit. Remote or local system monitoring is possible via a full set of status signals that include fan fail, DC good, remote inhibit and current monitoring. The DPF950, with full international safety approval and the CE mark, meets conducted emissions EN55022 level B. The DPF950 is designed for use as a front end in medium power communication applications adopting distributed power architecture. The DPF950 can be used in conjunction with our complete range of 3 to 200W DC/DC converters to fully configure a distributed power system.

Notes

- 1 Fan fail and power good are open-collector signals.
- 2 All signals are referenced to earth ground, as is the 5V output.
- 3 The main output is floating.
- 4 The -48V fan is derived from the main output, but is diode isolated. Total power from the two cannot exceed 875W.
- 5 0Hz to 30MHz, measured differentially with a 0.1µF ceramic capacitor connected across each output.
