TYPICAL APPLICATION

MB40C328V

■ USAGE PRECAUTIONS

- Be sure to ground the pins of AV_{DD} , DV_{DD} , DV_{DDI} , V_{RT} , V_{RB} , V_{R1} , V_{R2} , and V_{R3} via high-frequency capacitor. Place the high-frequency capacitor as close as possible to the pin.
- To avoid generation of undesired current owing to indetermination of internal logic, set \overline{CE} to "H" at powering on and input more than five clock pulses just after operation (\overline{CE} : H \rightarrow L).
