+3.0V Output Type

V<sub>IN</sub>=V<sub>OUT</sub>×0.6 ; I<sub>OUT</sub>=30mA ; T<sub>a</sub>=25 (Unless otherwise specified)

Note:

" Supply current 1 " is the supply current while the oscillator is continuously oscillating. In actual operation the oscillator periodically operates. The current actually provided by an external V<sub>IN</sub> source from V<sub>OUT</sub> pin.

" Supply current 2 " is the supply current while the oscillator stop oscillating. In actual operation the oscillator periodically operates. The current actually provided by an external V<sub>IN</sub> source from V<sub>OUT</sub> pin
