Description

The MIM-0KM2AKL SERIES is miniaturized infrared receivers for remote control and other appplications requiring improved ambient light rejection.

The separate PIN diode and preamplifier IC are assembled on a single leadframe.

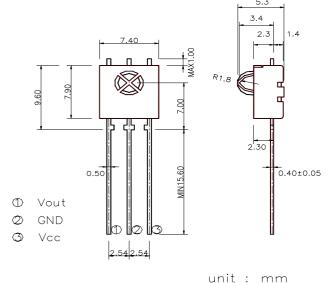

The epoxy package contains a special IR filter.

This module has excellent performance even in disturbed ambient light applications and provides protection against uncontrolled output pulses.

Features

- Photo detector and preamplifier in one package
- Internal filter for PCM frequency
- High immunity against ambient light
- Improved shielding against electric field disturbance
- 2.4-Volt supply voltage; low power consumption
- TTL and CMOS compatibility

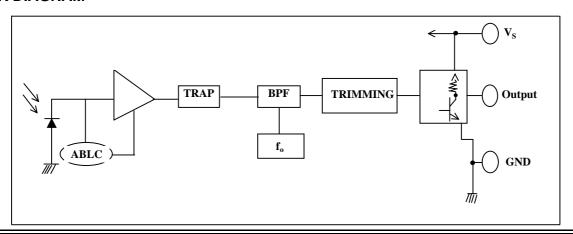

unit : mm

Ps 1. MATERIAL : 0.40 ±0.05 THICK

2. TOLERANCE : ±0.1 UNLESS OTHERWISE SPECIFIED

Inspection standard

- 1. Among electrical characteristics, total number shall be inspected on items blow.
 - 1-1 front distance between emitter & detector
 - 1-2 Current consumption
 - 1-3 H level output voltage
 - 1-4 L level output voltage
- 2. Items except above mentioned are not inspected particularly, but shall fully satisfy

CAUTION (When use and storage of this device)

- 1.Store and use where there is no force causing transformation or change in quality.
- 2.Store and use where there is no corrosive gas or sea(salt) breeze .
- 3.Store and use where there is no extreme humidity .
- 4. Solder the lead-pin within the condition of ratings. After soldering do not add extra force.
- 5.Do not wash this device . Wipe the stains of diode side with a soft cloth. You can use the solvent , ethylalcohol or methylalcohol or isupropylene only .
- 6.To prevent static electricity damage to the Pre-AMP make sure that the human body , the soldering iron is connected to ground before using .
- 7.Put decoupling device between Vcc and GND for reduse the noise from power supply line .
- 8. The performance of remote-control system depends on environments condition and ability of periferal parts. Customer should evaluate the performance as total system in those conditions after system up with components such as commander , micon and this receiver module .

Guarantee period and scope

- 1.Guarantee period
 - One year after delivery to desired place .
- 2. Guarantee scope
 - A re-delivery of goods will be carried out if the cause of malfunction lies in our device . However no responsibilities be taken for the inconveniences caused by the malfunction of our devices .

Others

- 1. This device is not design to endure radiative rays and heavily charged particles.
- 2.In case where any trouble or questions arise, both parties agress to make full discussion covering the said problem .
