RM515E SERIES "PUSH-PULL" CIRCULAR PLASTIC CONNECTORS

Scope

RM515 "SNAP-IN" Circular Plastic Connectors are designed to fill the needs of small size and light weight in video equipment and OA equipment. The RM515E series

is compatible with current metal RM15T series, plastic RM215 and RM315 series.

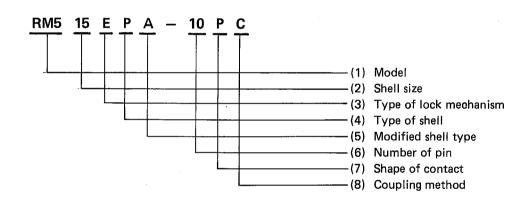

Features

- (1) "Snap-in" coupling mechanism assures easy and quick connection and disconnection.
- (2) Receptacle with "PUSH-PULL" coupling mechanism is compatible with current metal RM15T series thread coupling type and used as "PUSH-PULL" or "Thread" coupling mechanism.
- (3) Multiple polarzing keys ensure positive engagement.
- (4) Connector pins are arranged in a deep location in order to prevent bending of contacts when handling.
- (5) Molding of glass-filled polycarbonate provides light and robust body.
- (6) Compact design is suitable with any equipment.
- (7) Crimping type is available for plug and both crimping and Dip types are available for receptacles.
- (8) Available connection systems include solderless plug, and solderless and substrate dip-type receptacles, allowing the user to select the most suitable one for quick connection and for the model to be used.

Material and Finish

Description	Material	Finish
Molding and insulator	Glass-filled polycarbonate (UL94V-0)	(Black)
Male pin	Phosphor bronze	Silver plated
Female pin	Phosphor bronze	Silver plated

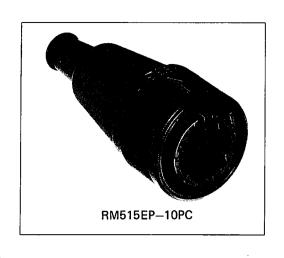

Ordering Information

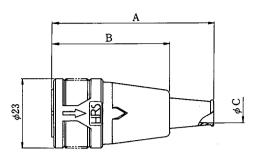

- (1) Model
 Round Miniature series name
 There are two types in RM series.
- (2) Shell size Sizes are shown external diameter of mating. RM2 and RM3 is available only for 15 size.
- (3) Type of lock mechanism E is shown as push-pull system.
- (4) Shell type
 P: Plug
 R: Recent
 - R: Receptacle

- (5) Modified shell identification
 If the molding is different from standard type,
 modified marks is given as A, B and so on.
- (6) Number of pin
 This connector only available 10 pin.
- (7) Shape of contact
 - P: Pin
 - S: Socket
- (8) Coupling method of pin
