

TO-220

ITO-220

TO-263
(D²PAK)

Pin Definition:

1. Ground
2. Input (tab)
3. Output

General Description

The TS7900B series of fixed output negative voltage regulators are intended as complements to the popular TS7800B series device. These negative regulators are available in the same seven-voltage options as the TS7900B devices. In addition, one extra voltage option commonly employed in MECL systems is also available in the negative TS7900B Series. Available in fixed output voltage options from -5.0 to -24 volts, these regulators employ current limiting, thermal shutdown, and safe-area compensation--making them remarkably rugged under most operating conditions. With adequate heat sinking they can deliver output currents in excess of 1 ampere. This series is offered in 3-pin TO-220, ITO-220 & TO-263 package.

Features

- Output Voltage Range -5 to -24V
- Output current up to 1.5A
- No external components required
- Internal thermal overload protection
- Internal short-circuit current limiting
- Output transistor safe-area compensation
- Output voltage offered in 4% tolerance

Ordering Information

| Part No. | Package | Packing |
|--------------|---------|-------------------|
| TS79xxBCZ C0 | TO-220 | 50pcs / Tube |
| TS79xxBCI C0 | ITO-220 | 50pcs / Tube |
| TS79xxBCM RN | TO-263 | 800pcs / 13" Reel |

Note: Where **xx** denote voltage option

Standard Application Circuit

A common ground is required between the input and the output voltages. The input voltage must remain typically 2.0V above the output voltage even during the low point on the Input ripple voltage.

XX = these two digits of the type number indicate voltage.

* = C_{in} is required if regulator is located an appreciable distance from power supply filter.

** = C_o is not needed for stability; however, it does improve transient response.

Absolute Maximum Rating (Ta = 25°C unless otherwise noted)

| Parameter | Symbol | Limit | Unit |
|--------------------------------|--------------------|------------------|------|
| Input Voltage | V _{IN} * | -35 | V |
| Input Voltage | V _{IN} ** | -40 | V |
| Power Dissipation | P _D | Internal Limited | W |
| Operating Junction Temperature | T _J | 0~+125 | °C |
| Storage Temperature Range | T _{STG} | -65~+150 | °C |
