## DESCRIPTION

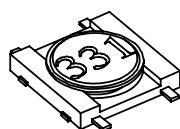

The P7606 family comprises very low profile inductors for height constrained applications.

Four sizes are available using the same PCB footprint but varying in height from 1.0 to 2.5mm.

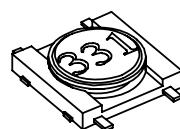

Despite their small size, these inductors are capable of being used in genuine power applications with saturation currents up to 2A.

The family covers inductance over a wide range from 2.2 $\mu$ H to 3300 $\mu$ H.

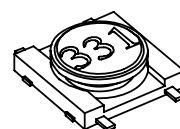

The parts are mechanically robust and are supplied with Pb-free terminations, compliant with RoHS Directive 2002/95/EC, and suitable for Pb-free and conventional placement and reflow.

### Notes

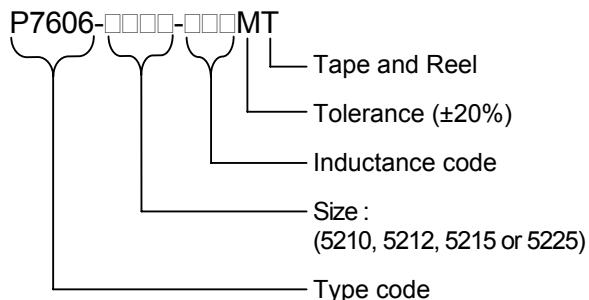

1. Inductance measured at 100kHz, 1V.
2.  $I_{RMS1}$  and  $I_{RMS2}$  are the currents at which the temperature rises 20°C and 40°C typical respectively.
3. Saturation Current,  $I_{sat}$ , is the DC current at which the zero current inductance drops by 10% (typ).
4. Operating temperature -25°C to +85°C.
5. For non-standard inductance values, please contact Profec.
