**Description**

Advanced Power MOSFETs from Silicon Standard provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The SSM4565M is in the SO-8 package, which is widely preferred for commercial and industrial surface mount applications, and is well suited for low voltage applications such as DC/DC converters.

 This device is available with Pb-free lead finish (second-level interconnect) as SSM4565GM.
