GENERAL DESCRIPTION

The 2731-200P is a 50 ohm matched Power Solution Module (PSM), consists of two common base high power transistors, for S-Band pulsed Radar systems. This PSM is capable of providing 200 Watts of pulsed RF output power at two hundreds microsecond pulse width ten percent duty factor across 2700-3100 MHz. This PSM is designed with the plug-n-play concept which is extremely user friendly and requires no additional tuning and impedance matching from the customer.

Mechanical Size is 2" x 1.41" x 0.21"
