DEVICE SPECIFICATION FOR  
**Light Emitting Diode**  
MODEL No. **GL5ZJ302B0S**

- These specification sheets include materials protected under the copyright of Sharp Corporation ("Sharp"). Please do not reproduce or cause anyone to reproduce them without Sharp's consent.
- When using this product, please observe the absolute maximum ratings and the instructions for use outlined in these specification sheets, as well as the precautions mentioned below. Sharp assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets, and the precautions mentioned below.
 

(Precautions)

  - This product is designed for use in the following application areas;
 

|  |                          |                  |
|--|--------------------------|------------------|
| * OA equipment                           | * Audio visual equipment | * Home appliance |
| * Telecommunication equipment (Terminal) | * Measuring equipment    |                  |
| * Tooling machines                       | * Computers              |                  |

If the use of the product in the above application areas is for equipment listed in paragraphs (2) or (3), please be sure to observe the precautions given in those respective paragraphs.
  - Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when this product is used for equipment which demands high reliability and safety in function and precision, such as ;
 

|  |
|--|
| * Transportation control and safety equipment (aircraft, train, automobile etc.) |
| * Traffic signals * Gas leakage sensor breakers * Rescue and security equipment  |
| * Other safety equipment   |
  - Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as ;
 

|   |
|---|
| * Space equipment * Telecommunication equipment (for trunk lines) |
| * Nuclear power control equipment * Medical equipment             |
  - Please contact and consult with a Sharp sales representative if there are any questions regarding interpretation of the above three paragraphs.
- Please contact and consult with a Sharp sales representative for any questions about this product.

GL5ZJ302BOS Specification

1. Application

This specification applies to the light emitting diode device Model No. GL5ZJ302BOS.  
[AlGaInP (dicing or scribe/brake type) Orange LED device]

2. Outline dimensions and pin connections ..... Refer to the attached sheet Page 2.

3. Ratings and characteristics ..... Refer to the attached sheet Page 3~4.

- 3-1. Absolute maximum ratings
- 3-2. Electro-optical characteristics
- 3-3. Derating Curve
- 3-4. Characteristics Diagram

4. Reliability ..... Refer to the attached sheet Page 5.

- 4-1. Test items and test conditions
- 4-2. Measurement items and Failure judgement criteria

5. Incoming inspection ..... Refer to the attached sheet Page 6.

- 5-1. Applied standard
- 5-2. Sampling method and level
- 5-3. Test items, judgement criteria and classifica of defect
- 5-4. Test items the surface is be applied for flat type, judgement criteria and classifica of defect

6. Supplement ..... Refer to the attached sheet Page 7~8.

- 6-1. Packing
- 6-2. Luminous intensity rank
- 6-3. Dominant wavelength rank
- 6-4. Environment

7. Precautions for use ..... Refer to the attached sheet Page 9~10.

- 7-1. Lead forming method
- 7-2. Notice of installation
- 7-3. Soldering Conditions
- 7-4. For cleaning

2. Outline dimensions and pin connections

Pin connections  
 ①. Anode  
 ②. Cathode

(Note) Unspecified tol. to be  $\pm 0.2\text{mm}$

(Note) Cold rolled steel leads are plated with but the tie-bar cut portions have no plating do not solder this part of the product.

| Unit | Material   | Finish                             | Drawing No.     |
|------|--|------------------------------------|-----------------|
| mm   | Lead : (Fe) Cold rolled steel<br>Package : Epoxy resin | Lead : Sn plated or wave soldering | 5 1 1 0 6 0 1 1 |

### 3. Ratings and characteristics

#### 3-1. Absolute maximum ratings

(Ta=25°C)

| Parameter                     | Symbol           | Value                  | Unit |       |
|-------------------------------|------------------|------------------------|------|-------|
| Power dissipation             | P                | 130                    | mW   |       |
| Continuous forward current    | I <sub>F</sub>   | 50                     | mA   |       |
| Peak forward current(Note 1)  | I <sub>FM</sub>  | 100                    | mA   |       |
| Derating factor               | DC               | -                      | 0.67 | mA/°C |
|                               | Pulse            | -                      | 1.33 | mA/°C |
| Reverse voltage               | V <sub>R</sub>   | 5                      | V    |       |
| Operating temperature         | T <sub>opr</sub> | -40 ~ 85               | °C   |       |
| Storage temperature           | T <sub>stg</sub> | -40 ~ 100              | °C   |       |
| Soldering temperature(Note 2) | T <sub>sol</sub> | 260 (within 5 seconds) | °C   |       |

(Note 1) Duty ratio=1/10,Pulse width=0.1ms

(Note 2) At the position of 1.6mm from the bottom resin package

#### 3-2. Electro-optical characteristics

(Ta=25°C)

| Parameter                    | Symbol         | Conditions         | MIN. | TYP. | MAX. | Unit |
|------------------------------|----------------|--------------------|------|------|------|------|
| Forward voltage              | V <sub>F</sub> | IF=20mA            | -    | 2.1  | 2.6  | V    |
| Luminous intensity (Note 3)  | I <sub>v</sub> |                    | 383  | 1300 | -    | mcd  |
| Peak emission wavelength     | λ <sub>p</sub> |                    | -    | 627  | -    | nm   |
| Dominant wavelength          | λ <sub>d</sub> |                    | -    | 618  | -    | nm   |
| Spectrum radiation bandwidth | Δλ             |                    | -    | 15   | -    | nm   |
| Reverse current              | I <sub>R</sub> | V <sub>R</sub> =4V | -    | -    | 100  | μA   |
| Terminal capacitance         | C <sub>t</sub> | V=0V,f=1MHz        | -    | 60   | -    | pF   |
| Viewing Angle                | 2θ 1/2         | IF=20mA            | -    | 30   | -    | deg. |

(Note 3) Refer to the supplement item 6. regarding the standard of rank classification.

#### 3-3. Derating Curve

Peak Forward Current Derating Curve

Forward Current Derating Curve

Peak Forward Current vs. Duty Ratio  
( $T_a=25^\circ\text{C}$ )

3-4. Characteristics Diagram(typ) (Note 1)

Forward Current vs. Forward Voltage  
( $T_a=25^\circ\text{C}$ )

Relative Luminous Intensity vs. Ambient Temperature  
( $I_F=20\text{mA}$ )

Relative Luminous Intensity vs. Forward Voltage  
( $T_a=25^\circ\text{C}$ )

(Note 1) Above characteristic data are typical data and not a guaranteed data.

**SHARP**

#### 4. Reliability

The reliability of products shall be satisfied with items listed below.

##### 4-1. Test items and test conditions

Confidence level: 90%

| Test items                           | Test conditions   | Samples (n)<br>Defective (C) | LTPD<br>(%) |

| Terminal strength (Bending)          | Weight:5N, 0° → 90° → 0° → -90° → 0°<br>/ each terminal                                   | n=11, C=0                    | 20          |
| Temperature cycling                  | -40°C(30min)~+100°C(30min),30 cycles  | n=22, C=0                    | 10          |
| High temp. and high humidity storage | Ta=+60°C, 90%RH, t=1000h  | n=22, C=0                    | 10          |
| High temperature storage             | Ta=100°C, t=1000h   | n=22, C=0                    | 10          |
| Low temperature storage              | Ta=-40°C, t=1000h   | n=22, C=0                    | 10          |
| Operation life                       | Ta=25°C, I <sub>F</sub> MAX, t=1000h *3   | n=22, C=0                    | 10          |

##### 4-2. Measurement items and Failure judgement criteria \*1

| Measurement        | Symbol         | Failure judgement criteria *2  |
|--------------------|----------------|--|
| Forward voltage    | V <sub>F</sub> | V <sub>F</sub> > U.S.L. × 1.2  |
| Reverse current    | I <sub>R</sub> | I <sub>R</sub> > U.S.L. × 2.0  |
| Luminous intensity | I <sub>v</sub> | I <sub>v</sub> > The first stage value × 2.0 or The first stage value × 0.5 > I <sub>v</sub> |

※ Solderability : Solder shall be adhere at the area of 95% or more of dipped portion.

※ Terminal strength : Package is not destroyed, and terminal is not slack.

\*1: Measuring condition is in accordance with specification.

\*2: U.S.L. is shown by Upper Specification Limit.

\*3: I<sub>F</sub> MAX.is shown by forward current of absolute maximum ratings.

# SHARP

## 5. Incoming inspection

5-1. Applied standard : ISO 2859-1

5-2. Sampling method and level : A single sampling plan, normal inspection level II  
 : AQL Major defect : 0.065%  
 Minor defect : 0.4%

### 5-3. Test items, judgement criteria and classifica of defect

| No. | Test items                                | judgement criteria   | classifica of defect |
|-----|---|--|----------------------|
| 1   | Disconnection                             | Not emit light   | Major defect         |
| 2   | Position of Cutting off rim               | Different from dimension   |                      |
| 3   | Reverse terminal                          | Different from dimension   |                      |
| 4   | Outline dimensions                        | Not satisfy outline specification  | Minor defect         |
| 5   | Characteristics                           | Over the limit value of specification at $V_F$ , $I_R$ , and $I_V$   |                      |
| 6   | Cut off the rim                           | Exceed -0.2mm  |                      |
| 7   | Foreign substance                         | White point : Exceed $\phi$ 0.3mm (on top view)<br>Black point : Exceed $\phi$ 0.3mm (on top view)<br>String form : Exceed 3.0mm (on top view) |                      |
| 8   | Scratch                                   | Exceed $\phi$ 0.3mm or 0.1mm $\times$ 1.0mm (on top view)  |                      |
| 9   | Void                                      | Exceed $\phi$ 0.3mm (on top view)  |                      |
| 10  | Uneven density of material for scattering | Extremely uneven density   |                      |
| 11  | Unbalanced center                         | Exceed $\pm$ 0.25mm from package center  |                      |
| 12  | Burr                                      | Exceed +0.2mm against provided dimension   |                      |
| 13  | Insertion position of terminal            | Insertion position of terminal   |                      |

### 5-4. Test items the surface is be applied for flat type, judgement criteria and classifica of defect

| No. | Test items          | judgement criteria                                   | classifica of defect |

| 14  | Chapped the surface | The surface chapped is striking for see the lamp top | Minor defect         |
| 15  | Hollow the surface  | The surface hollow is striking for see the lamp top  |                      |

# SHARP

## 6. Supplement

### 6-1. Packing

#### 6-1-1. Inner package

Put 250pcs the same luminous intensity rank products into pack and put following label by pack.

Product weight : 0.28g (One Product, Typ.)

(Indication label sample)

| SHIPMENT TABLE |               |                            |     |   |     |     |
|----------------|---------------|----------------------------|-----|---|-----|-----|
| PART No.       | GL5ZJ302BOS   | ← Model number             |     |   |     |     |
| QUANTITY       | 250           | ← Quantity of products     | * □ | □ | □ □ | □ □ |
| LOT No.        | KA99B19       | ← Lot number *             | ①   | ② | ③   | ④ ⑤ |
|                | □-□           | ← Luminous intensity rank  |     |   |     |     |
|                | S H A R P     | ← dominant wavelength rank |     |   |     |     |
|                | MADE IN JAPAN | ← Production country       |     |   |     |     |

- ① Production plant code(to be indicated alphabetically)
- ② Support code
- ③ Year of production(the last two figures of the year)
- ④ Month of production (to be indicated alphabetically with January corresponding to A)
- ⑤ Date of production(01~31)

#### 6-1-2. Outer package

Put 8 packs (the same luminous intensity rank) into outer package.  
(approximately 670g per one outer package)

#### 6-1-3. Outer package out line dimension

Width : 140mm, Depth : 225mm, Hight : 90mm

### 6-2.Luminous intensity rank (Note 1) (Ta=25°C)

| Rank | Luminous intensity |          | Unit | Condition            |
|------|--------------------|----------|------|----------------------|
| K    | 383                | ~ 746    | mcd  | I <sub>F</sub> =20mA |
| L    | 552                | ~ 1075   |      |                      |
| M    | 795                | ~ 1548   |      |                      |
| N    | 1144               | ~ (2229) |      |                      |

(Note 1) Tolerance:±15%

In regard to luminous intensity , the following ranking shall be carried out.  
However the quantity of each rank shall not be pre scribed.  
In case of the distribution of the luminous intensity shift to high, at that point new upper rank is prescribed and lower rank is delete.

### 6-3.Dominant wavelength rank (Note 2) (Ta=25°C)

| Rank | Dominant wavelength |         | Unit | Condition            |
|------|---------------------|---------|------|----------------------|
| T    | 613.5               | ~ 617.0 | nm   | I <sub>F</sub> =20mA |
| U    | 616.0               | ~ 619.5 |      |                      |
| V    | 618.5               | ~ 622.0 |      |                      |
| W    | 621.0               | ~ 624.5 |      |                      |
| X    | 623.5               | ~ 627.0 |      |                      |

(Note 2) The condition of measurement : The measurement of the light emission from the front side of lamp.  
This rank value is the setting value of when that classifies it the rank and be not a guarantee value.  
Also I shall not ask the delivery ratio of each rank.

**SHARP**

6-4. Environment

6-4-1. Ozonosphere destructive chemicals.

- (1) The device doesn't contain following substance.
- (2) The device doesn't have a production line whose process requires following substance.  
Restricted part: CFCs,halones,CCl<sub>4</sub>,Trichloroethane(Methychloroform)

6-4-2. Bromic non-burning materials

The device doesn't contain bromic non-burning materials(PBBOs,PBBs)

# SHARP

## 7. Precautions for use

### 7-1. Lead forming method

Avoid forming a lead pin with the lead pin base as a fulcrum: be sure to hold a lead pin firmly when forming. Lead pins should be formed before soldering.

### 7-2. Notice of installation

#### 7-2-1 installation on a PWB

When mounting an LED lamp on a PWB, do not apply physical stress to the lead pins.

- The lead pin pitch should match the PWB pin-hole pitch: absolutely avoid widening or narrowing the lead pins.
- When positioning an LED lamp, basically employ an LED with tie-bar cut or use a spacer.

#### 7-2-2 When an LED 1 is mounted directly on a PWB

If the bottom face of an LED lamp is mounted directly on single-sided PWB, the base of the lead pins may be subjected to physical stress due to PWB warp, cutting or clinching of lead pins. Prior to use, be sure to check that no disconnection inside of the resin or damage to resin etc., is found. When an LED lamp is mounted on a double-sided PWB, the heat during soldering affects the resin; therefore, keep the LED lamp more than 1.6mm afloat above the PWB.

#### 7-2-3 Installation using a holder

During an LED lamp positioning, when a holder is used, a holder should be designed not to subject lead pins to any undue stress.

(Note) Pay attention to the thermal expansion coefficient of the material used for the holder. Since the holder expands and contracts due to preheat and soldering heat, mechanical stress may be applied to the lead pins, resulting in disconnection.

#### 7-2-4 Installation to the case

Do not fix part C with adhesives when fixed to the case as shown in Figure. A hole of the case should be designed not to subject the inside of resin to any undue stress.

**SHARP**

7 - 3. Soldering Conditions

Solder the lead pins under the following conditions

| Type of Soldering   | Conditions  |
|---------------------|---|
| 1. Manual soldering | 295°C±5°C, within 3 seconds   |
| 2. Wave soldering   | 260°C±5°C, within 5 seconds   |
| 3. Auto soldering   | Preheating 70°C to 80°C, within 30 seconds<br>Soldering 245°C±5°C, within 5 seconds |

(Note) Avoid dipping resin into soldering bath.

Avoid applying stress to lead pins while they are heated. For example, when the LED lamp is moved with the heat applied to the lead pins during manual soldering or solder repair, disconnection may occur.

7 - 4. For cleaning

- (1) Solvent cleaning : Solvent temperature 45°C or less  
Immersion for 3 min or less
- (2) Ultrasonic cleaning : The effect to device by ultrasonic cleaning differs by cleaning bath size, ultrasonic power output, cleaning time, PWB size or device mounting condition etc. Please test it in actual using condition and confirm that doesn't occur any defect before starting the ultrasonic cleaning.
- (3) Applicable solvent : Ethyl alcohol, Methyl alcohol, Isopropyl alcohol

In case when the other solvent is used, there are cases that the packaging resin is eroded. Please use the other solvent after thorough confirmation is performed in actual using condition.
