

## 1Mb Ultra-Low Power Asynchronous CMOS SRAM

 $64K \times 16$  bit

#### Overview

The N01L63W3A is an integrated memory device containing a 1 Mbit Static Random Access Memory organized as 65,536 words by 16 bits. The device is designed and fabricated using ON Semiconductor's advanced CMOS technology to provide both high-speed performance and ultra-low power. The device operates with a single chip enable (CE) control and output enable (OE) to allow for easy memory expansion. Byte controls  $(\overline{\mathsf{UB}} \ \mathsf{and} \ \overline{\mathsf{LB}})$  allow the upper and lower bytes to be accessed independently. The N01L63W3A is optimal for various applications where low-power is critical such as battery backup and hand-held devices. The device can operate over a very wide temperature range of -40°C to +85°C and is available in JEDEC standard packages compatible with other standard 64Kb x 16 SRAMs.

#### **Features**

- Single Wide Power Supply Range 2.3 to 3.6 Volts
- Very low standby current 2.0µA at 3.0V (Typical)
- Very low operating current
   2.0mA at 3.0V and 1µs (Typical)
- Very low Page Mode operating current 0.8mA at 3.0V and 1µs (Typical)
- Simple memory control
   Single Chip Enable (CE)
   Byte control for independent byte operation
   Output Enable (OE) for memory expansion
- Low voltage data retention
   Vcc = 1.8V
- Very <u>fast</u> output enable access time 30ns OE access time
- Automatic power down to standby mode
- TTL compatible three-state output driver
- Compact space saving BGA package available

#### **Product Family**

| Part Number | Package Type       | Operating<br>Temperature | Power<br>Supply<br>(Vcc) | Speed       | Standby<br>Current (I <sub>SB</sub> ),<br>Typical | Operating<br>Current (Icc),<br>Typical |

| L  | Н  | Н     | L <sup>1</sup> | L <sup>1</sup> | High Z  | Active               | Active  |

- 1. When  $\overline{\text{UB}}$  and  $\overline{\text{LB}}$  are in select mode (low), I/O<sub>0</sub> I/O<sub>15</sub> are affected as shown. When  $\overline{\text{LB}}$  only is in the select mode only I/O<sub>0</sub> I/O<sub>7</sub> are affected as shown. When  $\overline{\text{UB}}$  is in the select mode only I/O<sub>8</sub> I/O<sub>15</sub> are affected as shown.
- 2. When the device is in standby mode, control inputs (WE, OE, UB, and LB), address inputs and data input/outputs are internally isolated from any external influence and disabled from exerting any influence externally.
- 3. When  $\overline{\text{WE}}$  is invoked, the  $\overline{\text{OE}}$  input is internally disabled and has no effect on the circuit.

### Capacitance<sup>1</sup>

| Item              | Symbol           | ol Test Condition                                      |  | Max | Unit |
|-------------------|------------------|--|--|-----|------|
| Input Capacitance | C <sub>IN</sub>  | V <sub>IN</sub> = 0V, f = 1 MHz, T <sub>A</sub> = 25°C |  | 8   | pF   |
| I/O Capacitance   | C <sub>I/O</sub> | V <sub>IN</sub> = 0V, f = 1 MHz, T <sub>A</sub> = 25°C |  | 8   | pF   |

1. These parameters are verified in device characterization and are not 100% tested

## Absolute Maximum Ratings<sup>1</sup>

| Item  | Symbol              | Rating                       | Unit |
|---|---------------------|------------------------------|------|
| Voltage on any pin relative to V <sub>SS</sub>  | V <sub>IN,OUT</sub> | -0.3 to V <sub>CC</sub> +0.3 | V    |
| Voltage on $V_{CC}$ Supply Relative to $V_{SS}$ | V <sub>CC</sub>     | -0.3 to 4.5                  | V    |
| Power Dissipation                               | $P_{D}$             | 500                          | mW   |
| Storage Temperature                             | T <sub>STG</sub>    | -40 to 125                   | °C   |
| Operating Temperature                           | T <sub>A</sub>      | -40 to +85                   | °C   |
| Soldering Temperature and Time                  | T <sub>SOLDER</sub> | 260°C, 10sec                 | °C   |

<sup>1.</sup> Stresses greater than those listed above may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operating section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.

#### **Operating Characteristics (Over Specified Temperature Range)**

| Item   | Symbol           | bol Test Conditions  |                      | Typ <sup>1</sup> | Max                  | Unit |
|--|------------------|--|----------------------|------------------|----------------------|------|

| Page Mode Operating Supply Current<br>@ 70ns Cycle Time <sup>3</sup> (Refer to Power<br>Savings with Page Mode Operation<br>diagram) | I <sub>CC3</sub> | VCC=3.6 V, V <sub>IN</sub> =V <sub>IH</sub> or V <sub>IL</sub><br>Chip Enabled, I <sub>OUT</sub> = 0 |                      | 4.0              |                      | mA   |
| Read/Write Quiescent Operating Supply Current <sup>3</sup>   | I <sub>CC4</sub> | $V_{CC}$ =3.6 V, $V_{IN}$ = $V_{IH}$ or $V_{IL}$<br>Chip Enabled, $I_{OUT}$ = 0,<br>f = 0            |                      |                  | 3.0                  | mA   |
| Maximum Standby Current <sup>3</sup>   | I <sub>SB1</sub> | $V_{IN} = V_{CC}$ or 0V<br>Chip Disabled<br>$t_A = 85^{\circ}C$ , VCC = 3.6 V                        |                      | 2.0              | 20                   | μА   |
| Maximum Data Retention Current <sup>3</sup>  | I <sub>DR</sub>  | Vcc = 1.8V, $V_{IN} = V_{CC}$ or 0<br>Chip Disabled, $t_A = 85^{\circ}C$                             |                      |                  | 10                   | μА   |

<sup>1.</sup> Typical values are measured at Vcc=Vcc Typ.,  $T_A$ =25°C and are not 100% tested.

<sup>2.</sup> This parameter is specified with the outputs disabled to avoid external loading effects. The user must add current required to drive output capacitance expected in the actual system.

<sup>3.</sup> This device assumes a standby mode if the chip is disabled ( $\overline{\text{CE}}$  high). In order to achieve low standby current all inputs must be within 0.2 volts of either VCC or VSS

Note: Page mode operation is a method of addressing the SRAM to save operating current. The internal organization of the SRAM is optimized to allow this unique operating mode to be used as a valuable power saving feature.

The only thing that needs to be done is to address the SRAM in a manner that the internal page is left open and 16-bit words of data are read from the open page. By treating addresses A0-A3 as the least significant bits and addressing the 16 words within the open page, power is reduced to the page mode value which is considerably lower than standard operating currents for low power SRAMs.

## **Timing Test Conditions**

| Item                                     |   |
|--|---|
| Input Pulse Level                        | 0.1V <sub>CC</sub> to 0.9 V <sub>CC</sub> |
| Input Rise and Fall Time                 | 5ns                                       |
| Input and Output Timing Reference Levels | 0.5 V <sub>CC</sub>                       |
| Output Load                              | CL = 30pF                                 |
| Operating Temperature                    | -40 to +85 °C                             |

# Timing of Read Cycle ( $\overline{CE} = \overline{OE} = V_{IL}, \overline{WE} = V_{IH}$ )

## Timing Waveform of Read Cycle ( $\overline{WE} = V_{IH}$ )

## Timing Waveform of Write Cycle (WE control)

### Timing Waveform of Write Cycle (CE Control)

#### 44-Lead TSOP II Package (T44)

#### Note:

- 1. All dimensions in inches (Millimeters)
- 2. Package dimensions exclude molding flash

→ SD A1 BALL PAD CORNER

**TOP VIEW** 

1. DIMENSION IS MEASURED AT THE MAXIMUM SOLDER BALL DIAMETER. PARALLEL TO PRIMARY Z.

SIDE VIEW

- 2. PRIMARY DATUM Z AND SEATING PLANE ARE DEFINED BY THE SPHERICAL CROWNS OF THE SOLDER BALLS.
- 3. A1 BALL PAD CORNER I.D. TO BE MARKED BY INK.

#### **Dimensions (mm)**

| D      | E      | e = 0.75 |       |       |       | BALL<br>MATRIX |
|--------|--------|----------|-------|-------|-------|----------------|
|        |        | SD       | SE    | J     | K     | TYPE           |
| 6±0.10 | 8±0.10 | 0.375    | 0.375 | 1.125 | 1.375 | FULL           |

#### **Ordering Information**

| Part Number    | Package                           | Shipping Method |
|----------------|-----------------------------------|-----------------|
| N01L63W3AT5I   | Leaded 44-TSOP II                 | Tray            |
| N01L63W3AT25I  | Green 44-TSOP II (RoHS Compliant) | Tray            |
| N01L63W3AB5I   | Leaded 48-BGA                     | Tray            |
| N01L63W3AB25I  | Green 48-BGA (RoHS Compliant)     | Tray            |
| N01L63W3AT5IT  | Leaded 44-TSOP II                 | Tape & Reel     |
| N01L63W3AT25IT | Green 44-TSOP II (RoHS Compliant) | Tape & Reel     |
| N01L63W3AB5IT  | Leaded 48-BGA                     | Tape & Reel     |
| N01L63W3AB25IT | Green 48-BGA (RoHS Compliant)     | Tape & Reel     |

#### **Revision History**

| Revision # | Date           | Change Description   |
|------------|----------------|--|
| Α          | Jan. 2000      | Initial advance release  |
| В          | Apr. 2001      | Access time 55ns @ 3.0V, corrected voltage range, TSOP mechanical package drawing, misc. errata  |
| С          | Sept. 2001     | Misc. modifications, preliminary release   |
| D          | Dec. 2001      | Part number change from EM064L16, modified Overview and Features, added Page Mode Operation diagam, revised Operating Characteristics table, Functional Description table and Ordering Information diagram |
| E          | Nov. 2002      | Replaced Isb and Icc on Product Family table with typical values   |
| F          | Oct. 2004      | Added Pb-Free and Green Package Option   |
| G          | Nov. 2005      | Removed Pb-Free Pkg, added Green Pkg and RoHS Compliant  |
| Н          | September 2006 | Converted to AMI Semiconductor   |
| 9          | July 2008      | Converted to ON Semiconductor and new part numbers   |

ON Semiconductor and are registered trademarks of Semiconductor Components Industries, LLC (SCILLC).
