- Fastens to any convenient location
- Comes with double-sided adhesive tape for mounting

## ORDERING INFORMATION

DS1401-04      Four-button version, as shown  
in the picture

**DS1401-04**

## DESCRIPTION

*i*Buttons can be conveniently accessed using the DS1401 Front Panel *i*Button Holder and DS1402 MicroLAN cables.

The DS1401 is connected to the computer using a DS1402BR8 MicroLAN Cable and a Dallas COM Port Adapter. It mounts to any surface (top of tower computer, CRT, keyboard).

The DS1401 supports Dallas' MicroLAN architecture, allowing *i*Buttons to be inserted into Button ports in any combination. Each device's unique 64-bit ID makes location detection automatic.

The DS1401 uses DS9100A and DS9100B Touch-and-Hold Probe Stampings for ground and data contact, respectively. These stampings are designed for F5 MicroCans<sup>®</sup> and dwelled contact.

*i*Button and MicroCan are registered trademarks of Dallas Semiconductor.
