SMT Power Inductors–DO3316 Series

Parts/reel: 13" 1,000 Tape width: 24 mm
For packaging data see Tape and Reel Specifications section.

The DO3316 Series of surface mount inductors is designed for the smallest possible size, lowest cost and highest performance. Their high energy storage and very low resistance make them the ideal inductors for DC-DC conversion in notebook computers, PDAs, step-up or step-down converters, flash memory programmers, etc.

For reliable surface mounting, we've designed the DO Series with a flat top and robust temperature deflection to prevent damage during solder reflow.

In addition to the standard versions shown here, custom inductors are available to meet your exact requirements. Coilcraft **Designer's Kit C105** contains 3 samples each of the standard parts shown as well as all standard values from the DO1608 Series.
