Description

Bluegiga Access Point 3201 (AP3201) is a size optimized access device targeted at business applications. The Access Point provides up to 200 meter range between two AP3201s and with Class 2 *Bluetooth* device 20 meter range. The product is designed to fit into wireless *Bluetooth* applications where the network performance, reliability, scalability and easy management are important design drivers.

The Access Point is equipped with Bluegiga's industry leading 2.1 + EDR compliant WT11 *Bluetooth* module providing users with the features and benefits of the very latest *Bluetooth* standard. The product also has an external USB connector for extending the product capabilities with GPRS/3G USB modems, Wi-Fi or extra memory.

The Access Point is an evolution from Bluegiga's extremely reliable and successful Access Server product family. The product's software and user interface makes it compatible with Bluegiga Access Servers. Access Point 3201 can be remotely managed with Bluegiga Solution Manager (BSM) - enabling remote management of a number of Access Points from a centralized location.

The heart of Access Point 3201 is Bluegiga's customized Linux operating system with a number of built-in applications, such as SPP-over-IP and ObexSender. For *Bluetooth* wireless technology, The product has extremely advanced, reliable and easy-to-use software interface called iWRAP, which enables you to connect your *Bluetooth* equipped devices into TCP/IP networks with built-in security and reliability. Access Point 3201 is also available for OEM's without the housing providing total freedom of re-branding.
