

## Description

The MIM-93M5XSF SERIES is miniaturized infrared receivers for remote control and other applications requiring improved ambient light rejection.

The separate PIN diode and preamplifier IC are assembled on a single leadframe.

The epoxy package contains a special IR filter.

This module has excellent performance even in disturbed ambient light applications and provides protection against uncontrolled output pulses.

## Features

- Photo detector and preamplifier in one package
- Internal filter for PCM frequency
- High immunity against ambient light
- Improved shielding against electric field disturbance
- 5-Volt supply voltage; low power consumption
- TTL and CMOS compatibility

## MIM-93M5XSF Series Models

- MIM-93M5ASF 37.9KHz
- MIM-93M5BSF 32.7KHz
- MIM-93M5DSF 36.7KHz
- MIM-93M5ESF 36.0KHz

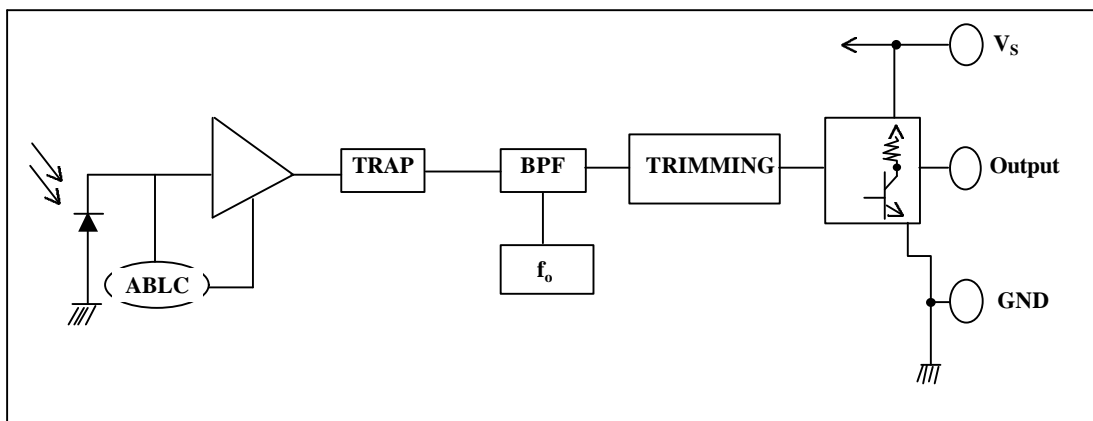

- ① Vout
- ② Vcc
- ③ GND

Ps 1. TOLERANCE :  $\pm 0.1$  UNLESS OTHERWISE SPECIFIED

Unit : mm

## BLOCK DIAGRAM

# MIM-93M5XSF SERIES

## Absolute Maximum Ratings

@  $T_a=25$

| Item                  | Symbol    | Ratings    | Unit | Remark            |
|-----------------------|-----------|------------|------|-------------------|
| Supply voltage        | $V_{CC}$  | 5.8        | V    |                   |
| Operating temperature | $T_{opr}$ | -10 ~ + 60 |      |                   |
| Storage temperature   | $T_{stg}$ | -20 ~ + 75 |      |                   |
| Soldering temperature | $T_{sd}$  | 260        |      | Maximum 5 seconds |

## Electro-optical characteristics ( $V_{CC}=5V$ )

( $T_a=25^\circ C$ ,  $V_{CC}=5V$ )

| Parameter                           | Symbol                                | Min.                | Typ. | Max. | Unit            | Remarks              |
|-------------------------------------|---------------------------------------|---------------------|------|------|-----------------|----------------------|
| Current consumption                 | I <sub>cc</sub>                       |                     |      | 5.0  | mA              | Under no signal      |
| Response wavelength                 | p                                     |                     | 940  |      | nm              |                      |
| Tuning frequency                    | f <sub>0</sub>                        | 32.7,36.0,36.7,37.9 |      |      | KH <sub>Z</sub> |                      |
| Output form                         | - - - - - active low output - - - - - |                     |      |      |                 |                      |
| H level output voltage              | V <sub>0h</sub>                       | 4.2                 |      |      | V               |                      |

| Distance between emitter & detector | L                                     | 10.0                |      |      | m               | Note 1               |
| Half angle                          |                                       |                     | ±45  |      | deg             | Horizontal direction |

## Test Method

### A. Standard Transmitter

ON/OFF pulse width satisfied from 25 cm to detection limit

Fig 1. Burst Wave

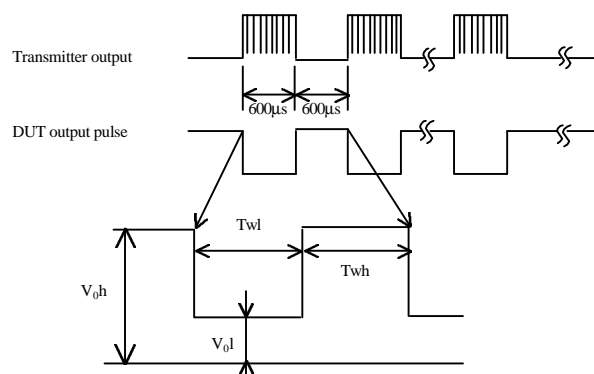

Fig 2. Standard Transmitter Measurement circuit

### B. Detection Length Test

## C . Pulse Width Test

## Application Circuit

\*) only necessary to suppress power supply disturbances.

\*\*) tolerated supply voltage range :  $4.1V < V_{cc} < 5.8V$

## CHARACTERISTIC CURVES ( $T_A=25^\circ C$ )

SUPPLY VOLTAGE vs. SUPPLY CURRENT

INPUT LEVEL vs. OUTPUT PULSE WIDTH

NOTE 1. Distance between emitter & detector specifies maximum distance that output wave form satisfies the standard under the conditions below against the standard transmitter.

(1) Measuring place ..... Indoor without extreme reflection of light.

(2) Ambient light source... Detecting surface illumination shall be  $200 \pm 50$  Lux under ordinary  
hite fluorescence lamp of no high frequency lighting.

(3) Standard transmitter ... Burst wave indicated in Fig 1. of standard transmitter

shall be arranged to 50mVp-p under the measuring circuit specified in Fig 2.

# MIM-93M5XSF SERIES

## Reliability

| Test item               | Test condition  | Standard |
|-------------------------|---|----------|
| High temperature        | Ta=+60 Vcc=5.0 V t=240H   | Note 2.  |
| High temp. & high humi. | Ta=+40 90%RH Vcc=5.0V t=240H  | Note 2.  |
| Low temperature         | Ta= -10 Vcc=5.0V t=240H   | Note 2.  |
| Heat cycle              | -20 (0.5H) ~ +75 (0.5H) 20cycle   | Note 2.  |
| Dropping                | Test devices shall be dropped 3 times naturally onto hard wooden board from a 75cm height position. | Note 3.  |

NOTE 2. (electro-optical characteristics) shall be satisfied after leaving 2 hours in the normal temperature .

NOTE 3. (electro-optical characteristics) shall be satisfied and no conoid deforms and destructions of appearance .(excepting deforms of terminals)

## Inspection standard

- 1.Among electrical characteristics , total number shall be inspected on items blow.
  - 1-1 front distance between emitter & detector
  - 1-2 Current consumption
  - 1-3 H level output voltage
  - 1-4 L level output voltage
- 2.Items except above mentioned are not inspected particularly , but shall fully satisfy

## CAUTION ( When use and storage of this device )

- 1.Store and use where there is no force causing transformation or change in quality .
- 2.Store and use where there is no corrosive gas or sea(salt) breeze .
- 3.Store and use where there is no extreme humidity .
- 4.Solder the lead-pin within the condition of ratings. After soldering do not add extra force .
- 5.Do not wash this device . Wipe the stains of diode side with a soft cloth. You can use the solvent , ethylalcohol or methylalcohol or isopropylene only .
- 6.To prevent static electricity damage to the Pre-AMP make sure that the human body , the soldering iron is connected to ground before using .
- 7.Put decoupling device between Vcc and GND for reduce the noise from power supply line .
- 8.The performance of remote-control system depends on environments condition and ability of periferal parts. Customer should evaluate the performance as total system in those conditions after system up with components such as commander , micon and this receiver module .

## Guarantee period and scope

- 1.Guarantee period  
One year after delivery to desired place .
- 2.Guarantee scope  
A re-delivery of goods will be carried out if the cause of malfunction lies in our device .However no responsibilities be taken for the inconveniences caused by the malfunction of our devices .

## Others

- 1.This device is not design to endure radiative rays and heavily charged particles .
- 2.In case where any trouble or questions arise,both parties agress to make full discussion covering the said problem .
