

SUMICON 1600 SERIES RECTANGULAR CONNECTORS

The SUMICON 1600 series are multi-contact connectors designed by Hirose. 8, 12, 16, 20, 24, 28, 34, 45 and 60-contact models available (same as the 1300 series). The connector units are available in three types: soldering, wrapping, and crimping. Accessories

are C case, CA case, CBA case, ST stopper, STA stopper, and STB stopper. By combining the many options noted above, the SUMICON 1600 series connectors meet a wide variety of applications.

Standard Type

General

In the SUMICON 1600 series, the connector unit is completely separated from the accessories such as the cases and stoppers to diversify the specifications and

facilitate wiring connection. The SUMICON 1600 series are specified in the NTT specifications No.1931.

Electrical Characteristics

| Item | Standard |
|-----------------------|---------------------------|
| Contact Resistance | 7mΩ or less at DC1A |
| Insulation Resistance | 1000M Ω or more at DC500V |
| Withstand Voltage | AC1000V for 1 minute |
| Current Rating | 3A |
| Voltage Rating | AC300V |

Material and Finish

| Part | Material | Finish |
|-----------------|-------------------------------------|--|
| Insulator | Glass filled diallylphthalate resin | Blue |
| Male Terminal | Brass | Type A: Silver-plated |
| Female Terminal | Phosphor bronze | Type B: Gold-plated |
| Plug Case | ABS resin (black) | NTT spec: ABS resin, 2.5PB 6.0/2.0 (color) |
| Stopper Bracket | Steel | Treatment with chromate over zinc plating |

Wire Wrapping Specifications

| Applicable wire | AWG | 26 | 28 | 30 |
|----------------------------------|----------------------|------------------|------------------|------------------|
| | Applicable wire (mm) | 0.41 | 0.32 | 0.26 |
| | Max.coating O.D.(mm) | 0.95 | 0.75 | 0.6 |
| Wrapping method | Ordinary wrapping | Coating one wrap | Coating one wrap | Coating one wrap |
| Effective number of wrappings | about 8 | about 8 | about 8 | about 9 |
| Number of wrappings per terminal | 2 wrap | | | |

SHOULDER-TOUCH LOCK TYPE

General

The shoulder-touch lock type plug cases are highly reliable, lightweight, sturdy, and operable. 8, 12, and 16-contact models are available. Hirose high-density packaging plug cases, including the top-touch lock type, are available in 8 to 60-contact models.

Material and Finish

1600 SUMICON CRIMP TYPE CONNECTORS

General

The SUMICON 1600 series are high-performance compact crimp type connectors developed for labor saving in connection work. 8, 12, 16, 20, 24, 34, 45 and 60-contact models are available. All models are compatible with our previous top-lock type plug cases. For using the connectors separately, easy-to-mount plastic locks are available to expand their functions.

Electrical and Environmental Characteristics

Material and Finish

| Item | Standard | | | |
|---|---|----------|----------|----------|
| Contact Resistance | 7mΩ or less at DC 1A (contact only) | | | |
| Insulation Resistance | 5,000MΩ or more at DC 500V | | | |
| Withstand Voltage | AC 1,000V for 1minute | | | |
| Rating Current | 3A | | | |
| Applicable Cable | AWG # 24-28 (Coating O.D. 1.6 φ -0.9 φ) | | | |
| Crimping strength (Unit: kg or more) | Cable | AWG # 24 | AWG # 26 | AWG # 28 |
| | Crimping force | 3.6 | 2.4 | 1.6 |

| Part | Material | Finish |
|-----------------|--|------------------------------|
| Insulator | Glass-containing polycarbonate resin UL94V-0 | Blue |
| Male Terminal | Brass | Gold-plated Silver-plated |
| Female Terminal | Phosphor bronze | Gold-plated Silver-plated |

Features

- (1) Since this is a press-fit type connector, anyone can perform wiring securely with high reliability.
- (2) For contact, a two-point contact system is employed for outstanding reliability. It also offers superior mechanical strength.
- (3) The Sumicon 1600 Series Press-Fit Type Connectors are interchangeable with the conventional solder, DIP and lapping type connectors. They are applicable, therefore, to a wider range of applications.
- (4) To use the connector unit separately, jointly employing an easily installable plastic lock will prevent vibrations and/or cable dead weight from unplugging the connector. The plastic lock, moreover, can be used with either center-suspension or panel-mount system.
- (5) All wiring spliced with the connector is hidden completely inside the housing, allowing for perfect insulation.

Ordering Information

● Housing

● Contact

Using the Connectors

- (1) Take care when removing the connectors to pull out by the housing and not tug on the wires.
- (2) The male terminals of the connectors will be bent if the connectors are twisted when being removed. Take care to pull the characters out straight.
- (3) The plastic locks are sufficiently strong to ensure that the connector engagement will not be loosened by vibration or the weight of the wires. Their strength is not sufficient for other loads. When strength for some other load is required, use the top-touch lock type plug case (common for both solder and wrapping types).
- (4) Both gold-plated and silver-plated terminals are available. Use the gold-plated type in adverse environments. In other environments, we recommend the economical silver-plated type.
- (5) For crimping, use a manual crimping device for low-volume crimping and maintenance. For high-volume crimping, we recommend the automatic crimping machine shown on page 124.
- (6) For plug-in uses, we recommend Sumicon 1600 series solder or wrapping types for improved functionality.

Assembling Procedure

Procedure for Contact Extraction

In case of extracting a contact from the housing due to insertion error or circuit change, follow the steps as shown below.

1. Hold the Contact Extractor as shown in Fig.1, placing the tip of the Extractor on the tip of a contact, then insert it between the contact and the housing.
2. When the tip of the Extractor comes into contact with a stepped part in the housing, the spring will come off from the stepped part with a snap which can be felt. Then, extract the contact by pulling the wire.

3. Above Fig.1 and Fig.2 show how to extract a contact from socket housing. The same procedure can be employed to extract a contact from pin housing.
- (Caution: Pushing the tip of the extractor forcibly before the spring has come off from the stepped part may damage the contact).

Hints on Use of Connectors with Respect to Polarity (to prevent mis-insertion of connectors)

Polarization of SUMICON 1600 series can be achieved by contact arrangement. The crimp type contacts are designed to float a little, so that the use of a Polarizing

Key is recommended in order to ensure positive polarization.

In Case of 8,12 and 16 pin

1. When crimp types are used in both the male and female, do not fill all cavities with contacts. Use Polarizing Key at minimum 2 cavities of Socket housing as shown below and do not fill pin contacts at the corresponding cavities of male housing.
2. When male crimp type is used in combination with solder or wire wrap female type, the connector coupling shall be done carefully not to couple in reverse position. Coupling shall be made by matching of triangle marks on connector inserts.

In Case of Multi Pin Type more than 20 pin

1. SUMICON 1600 series are naturally polarized in all cavities filled with contacts. When all cavities are not filled, Polarizing Keys shall be inserted in vacant cavities to the minimum for preventing reverse coupling. But when Top Touch Lock Plug Shell is used, Polarizing Keys are not necessary
2. because Plug Shell has polarized mechanism. When male crimp type is used with some vacant cavities in combination with solder or wire wrap female type, Top Touch Lock Plug Shell is recommended.

SUMICON 1600 SERIES DIP SOLDERING CONNECTORS

General

The SUMICON 1600 series are original Hirose rectangular dip soldering connectors 8,12,16,20,24,34,45 and 60-contact models are available. All models are compatible with the previous 1600 series in mounting and accessories.

Features

1. Allows straight dip soldering onto a PCB, and is effective in PCB-to-PCB and PCB-to-cable connection.
2. Suitable for use in interfaces, being compact and lightweight and meeting high-density packaging requirements.
3. Further cuts interconnection costs when simple locks are used.
4. A wide variety of combinations of connection methods available, e.g., dip soldering, wrapping, and crimping, to meet your requirements.

Main Applications

Computers, peripherals and terminals, data communications equipment, measuring instruments,

signal equipment, mobile radio equipment, copier, and FAX machine.

Electrical and Environmental

| *CL216-0420-8 | D-1600-SPB | For packing with Connector unit stopper (applicable for models with any number of contacts) |

* Standard

Mounting screws must be supplied by the customer

Note 1: The connector unit packaging spacer (SPA) cannot be used for packing with the connector unit stopper bracket.
The packaging spacer with connector unit stopper bracket (SPB) cannot be used for packaging the connector unit.

Note 2: Provide two spacers (SPA and SPB) for each connector unit.

* The dimensions marked with an asterisk (*) are for PCBs of 1.6mm in thickness.

How to use connectors

- (1) When disconnecting, pull it as straight as possible, because the male pins might be damaged if it is twisted.
- (2) Connectors are available with gold to be used in adverse environmental conditions and silver-plated pins be used in ordinary conditions.

Recommended Dip Soldering Pattern of Connector

(mm)

SUMICON 1600 SERIES RIGHT-ANGLE DIP SOLDERING CONNECTORS (MALE)

General

The SUMICON 1600 series are Hirose right-angle dip soldering connectors (male). All models are compatible with the existing soldering

type, wrapping type, crimping type, and straight dip soldering type connectors including their accessories. 20, 28, 34 and 60-contact models are available.

Features

1. Direct dip soldering on a PCB enables convenient parallel connection with cable plugs.
2. Suitable as an interface, being lightweight and capable of high-density packaging.
3. Further cuts interconnection costs by using crimping type plugs with plastic locks for simple cable connection, so no cases are needed.
4. A wide variety of connection methods available, e.g., dip soldering, wrapping, and crimping, to meet your requirements.
5. Available with or without a top-touch lock type bracket and side-lock type bracket, offering you many choices for your applications.
6. Highly solvent-resistant, using insulating materials with high heat resistance and chemical-resistance.

Main Applications

Electronic equipment such as computers, peripherals and terminals, control equipment, and measuring instruments.

Electrical and Environmental

| Electrical Characteristics | |
|----------------------------|-------------------------------------|
| Current Rating | 3A |
| Voltage Rating | AC 300V |
| Contact Resistance | 10m Ω or less at DC 1 A |
| Insulation Resistance | 1000M Ω or higher at DC 500V |
| Withstand Voltage | 1,000 Vr.m.s. for 1 minute |

| Material and Finish | | |
|---------------------|-----------------------------------|--|
| Insulation | Glass-Filled diallyphtalate resin | Blue |
| Contact | Brass | Type A: Silver-plated Type B: Gold-plated |
| Right Angle | Polybutylenephtalate resin | Blue(UL94V-0) |
| Stopper Bracket | Steel | Treated with chromate over zinc plating |

Ordering Information

(1) Shape of terminal opening

P: Male terminal

(2) Terminal connection method

R: Right-angle dip soldering

(3) Series No.

16: 1600 series

(4) Number of contacts

(5) Serial sign for connector units

Provided with a sequence of upper-case alphabetic characters.

(6) Plating

A: Silver-plated

G: Gold-plated

(7) Accessories

ST: Side-lock type stopper bracket

STA: Top-touch type stopper bracket

(8) R: Indicates a connector on which the STA bracket is mounted in the reverse direction against the standard. (the standard refers to the direction in which both \triangle marks on the STA bracket and connector unit are in the same direction).

Right Angle Dip Soldering Pin Connectors With Stopper Bracker for Top-Touch Lock Plug Shell

With Stopper Bracket for Top Touch Lock Plug Shell in Reverse Position

CL216-0498-5
PR-1634BA-STAR

| No. of Pin | Type A | | A | B | C |
|------------|------------------|---------------------|----|----|----|
| | HRS No. | Part No. | | | |
| 20 | *CL216-0495-7-09 | PR-1620BA-STAR (09) | 27 | 33 | 36 |
| 28 | *CL216-0497-2-09 | PR-1628BA-STAR (09) | 34 | 40 | 43 |
| 34 | *CL216-0498-5-09 | PR-1634BA-STAR (09) | 39 | 45 | 48 |
| 60 | *CL216-0500-5-09 | PR-1660BA-STAR (09) | 61 | 67 | 70 |

*: Standard Gold plated types are available options.

Note: When this type is used the mounting direction of socket insert in plug shell shall be in reverse position against the triangle mark on plug shell.

How to Use (Example)

How to Use Right Angle Dip Soldering Connectors

1. The standard use of this type is to mount it on the left side of a vertical PC board. (Fig. 1)

Fig. 1

2. It is possible to mount it on the right side of PCB but special caution is necessary to be opposite all pin locations on dip soldering surface. (Fig. 2)

Fig. 2

3. When Top Touch Lock Type Plug Shell and Stopper Bracket are used with mounts on the right side of a PCB, not only the pin locations become opposite, but also the Lock Release Button and Cable

Exit are upside down. So, the Reverse Mount Stopper Bracket is convenient in such case.(Fig.3)

Fig. 3

4. M2.6 screws are recommended to mount Right Angle Dip Soldering Pin Connectors.
5. Please choose PC board thinner than 2.4mm.
6. In extracting plug connector, please pull it up straight out to prevent male pin from bending.
7. The standard plating is silver but gold is also an available option.
8. Note: The dip soldering pattern on PCB of Right Angle Type and Straight Type are different from each other.
9. Before using a solvent other than trichloroethylene, chlorosene, methanol, isopropanol, or ethylalcohol to wash soldered connectors, contact our engineering department.

Recommended Dip Soldering Pattern

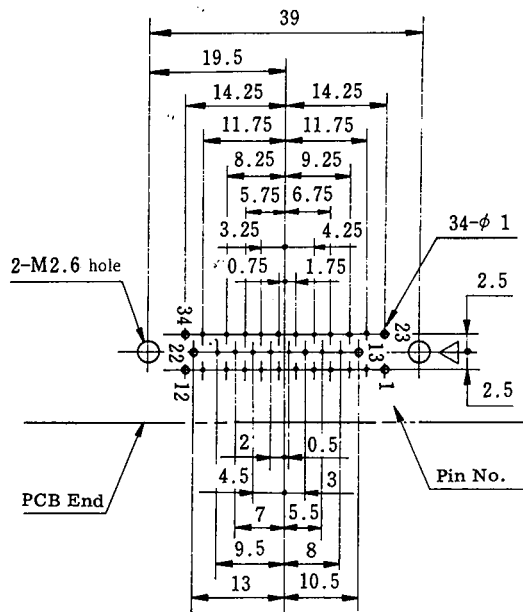

mm

PR-1620B

PR-1628B

PR-1634B

PR-1660B

Note 1. The triangle mark represents the position of the same mark on the connector unit.

2. Above pattern is shown from view direction of the connector mounting side.

Recommended Mounting Pattern

For insertion-soldering in the PCB, drill mounting holes as shown in the figure below.

mm

With top-touch-lock type stopper bracket

With side-lock type stopper bracket

Connector Unit Type

| No. of pin | A |
|------------|----|
| 20 | 27 |
| 28 | 34 |
| 34 | 39 |
| 60 | 61 |

The triangle mark represents the position of the same mark on the connector unit.

Above pattern is shown from view direction of the connector mounting side.

Function Chart 2

*Dust cap is available for STA stopper bracket.
