Model 1X505

Directional Couplers

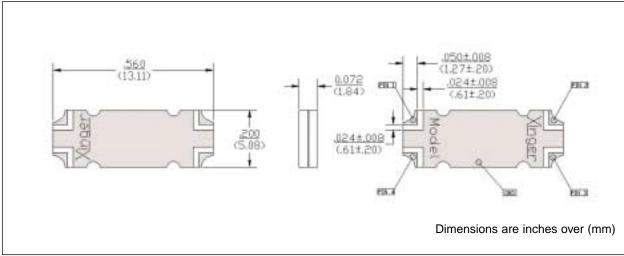

Description

The 1X505 is a low profile 5dB directional coupler in an easy to use miniature surface mount package covering the DCS and PCS bands. The 1X505 is ideal for 3 and 4 way inline split/combine amplifiers and for power injection and can be used in most high power designs. Parts have been run through rigorous qualification testing and units are 100% tested. They are manufactured using materials with x and y thermal expansion coefficients compatable with common substrates.
