

## Simplex Style (SFR) Transmitters and Receivers

The SFR style devices consist of a Base Part mounted in a Metal Simplex connector. LEDs and receivers are assembled to insure the best power output or responsivity for each dash number. All output power, responsivity, and sensitivity limits are those of the base part. See the dash number (-XXX) of the base part for the proper limits. For information on the Base Part see pages 16 & 17 for transmitters and pages 17 & 18 for receivers in this Selection Guide.
