

SKINTOP® SD-M, DV-M

Dust seal and sealing plug for metric SKINTOP® cable glands

SKINTOP® SD-M
Dust seal

For all assembly work on instruments, machines and assemblies. Where the cable connection is made later, we recommend our SKINTOP® screw-type cable glands with dust seal. This prevents dust, dirt and foreign bodies from penetrating inside the housing. Fixing is simplicity itself: nothing to take apart - just push the cable through.

SKINTOP® DV-M
Sealing plug

For all assembly work in which the cable connection is made later and when the inside of the housing must also be protected against moisture, a SKINTOP® Cable Gland together with sealing plug should be used SKINTOP® Cable Gland together with SKINTOP® DV-M.
