## 01175 SEVEN DOT PRINTHEAD

The 01175 is an array of seven dots on 0.0167" centers intended for EKG or other recorder annotation, printing 5 x 7 dot matrix characters. It is notched to an L-shape to provide maximum clearance for the chart pen. The 01175 has the same overall dimensions and typical operating voltage/pulsewidth as the TI EPN3300/3301 types. It is also available in a mirror-image version, the 01182. Both types need a heatsink to be added per customer requirement.

## NOTES:

- 1 - PIN DESIGNATION AS SHOWN ON TABLE #1.
- 2 - PRINTING VOLTAGE = 12V ± 1 VOLT @ 8 MSEC.
- 3 - NOMINAL RESISTANCE = 80Ω.
