Low-Saturation Bidirectional Motor Driver for Low-Voltage Applications

The LB1636M is a low-saturation bidirectional motor driver IC for use in low-voltage applications. It is especially suited for use in small-sized low-voltage motors for printers, cassette tape recorders, and commercial equipment.

Features

- Low-voltage (2.5V min) operation, low current dissipation ($I_{CC} \leq 30\mu A$) at the standby mode
- Low-saturation voltage (upper transistor + lower transistor residual voltage 1.2V max at 400mA)
- On-chip spark killer diodes
