

## 5A LOW DROPOUT POSITIVE REGULATOR

IL1084-XX

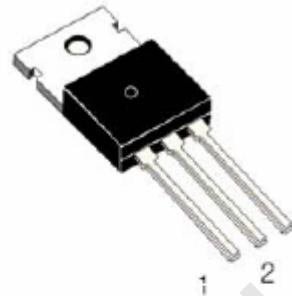

**Features**

- ◆ Output Current : 5A
- ◆ Maximum Input Voltage : 12V
- ◆ Adjustable Output Voltage or Fixed 1.5V, 1.8V, 2.5V, 2.85V, 3.3V, 3.6V, 5V
- ◆ Current Limiting and Thermal Protection
- ◆ Standard 3-Pin Power Packages

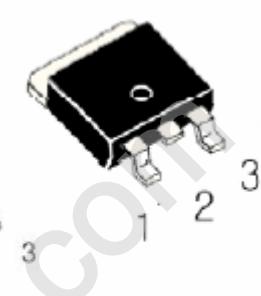

**Applications**

- ◆ Post Regulator for Switching DC/DC Converter
- ◆ High Efficiency Liner Regulators
- ◆ Battery Charger

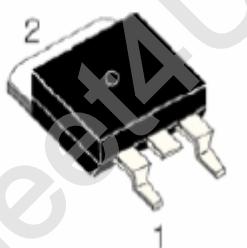

TO-220

TO-252

TO-263

1. ADJ/GND
2. Output
3. Input

**Absolute Maximum Ratings (Note 1)**

Power Dissipation (Note 2)

Internally Limited Junction Temperature (Note 3) 150°C

Storage Temperature Range -65°C to 150°C

**Operating Ratings**

Junction Temperature Range (Note 3) -10°C to 125°C

IK Semiconductor

## ELECTRICAL CHARACTERISTICS

Typicals and limits appearing in normal type apply for  $T_j = +25^\circ\text{C}$ .

Limits appearing in **Boldface** type apply over the entire junction temperature range for operation.

**NOTES 1:** Rating indicate conditions for which the device is intended to be functional, but specific performance is not Guaranteed. For guaranteed specifications and the test conditions, see the Electrical Characteristics.

**NOTES 2:** Power Dissipation is kept in a safe range by current limiting circuitry. Refer to Overload Recovery in Application Notes. **NOTES 3:** The maximum power dissipation is a function of  $T_j(\text{MAX})$ ,  $\Theta_{jA}$  and  $T_A$ . The maximum allowable power dissipation at any ambient temperature is  $PD=(T_j(\text{MAX}) - T_A)\Theta_{jA}$ . **NOTES 4:** Typical Values represent the most likely parametric norm. **NOTES 5:** All limits are guaranteed by testing or statistical analysis

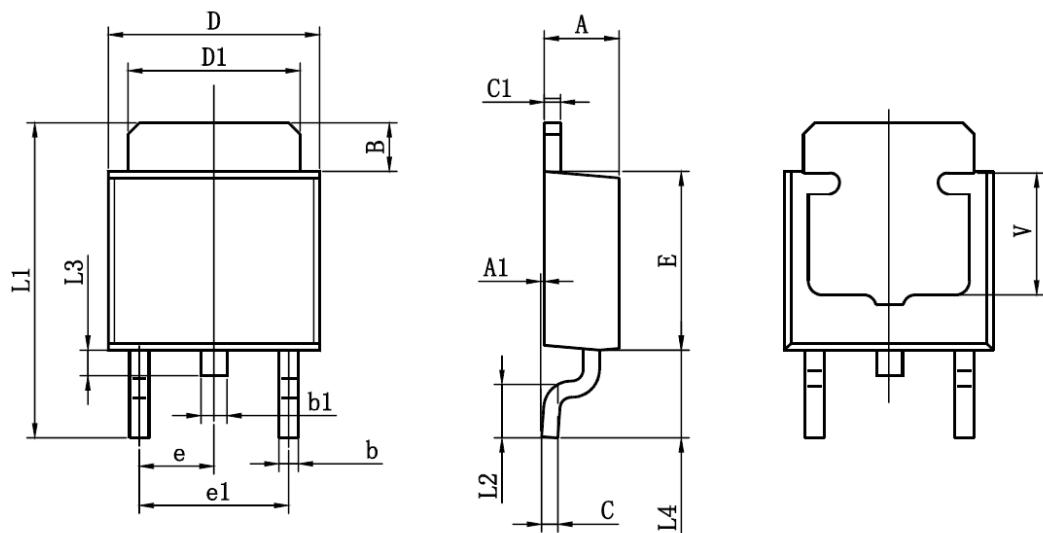

**NOTES 6:** IFULL LOAD is defined in the current limit curves. The IFULL LOAD curve defines the current limit as function

**NOTES 7:** Load and Line regulation are measured at constant junction temperature, and are guaranteed up to the maximum power dissipation of 30W. Power dissipation is determined by the input/output differential and the output current. Guaranteed maximum power dissipation will not be available over the full input/output range. **NOTES 8:** Dropout voltage is specified over the full output current range of the device
