## GaAs MMIC SUB-HARMONIC SMT MIXER, 24 - 34 GHz

### Typical Applications

The HMC338LC3B is ideal for:

- Point-to-Point Radios
- Point-to-Multi-Point Radios & VSAT
- Test Equipment & Sensors
- Military End-Use
- SAT COM

### Features

- Integrated LO Amplifier: -5 dBm Input
- Sub-Harmonically Pumped (x2) LO
- DC - 3 GHz Wideband IF
- RoHS Compliant 3x3 mm SMT Package
- Single Positive Supply: +4V @ 31mA

### Functional Diagram

### General Description

The HMC338LC3B is a 24 - 34 GHz Sub-harmonically Pumped (x2) MMIC Mixer with an integrated LO amplifier in a leadless RoHS compliant SMT package. The 2LO to RF isolation is excellent at 30 dB, eliminating the need for additional filtering. The LO amplifier is a single bias (+3V to +4V) design with a nominal -5 dBm drive requirement. The RF and LO ports are DC blocked and matched to 50 Ohms for ease of use while the IF covers DC to 3 GHz. The HMC338LC3B eliminates the need for wire bonding, allowing use of surface mount manufacturing techniques.

### Pin Descriptions

Pin Number	Function	Description	Interface Schematic
1, 3, 4, 6, 7, 9	GND	Package bottom must also be connected to RF/DC ground.	
2	LO	This pin is AC coupled and matched to 50 Ohms from 12 - 17 GHz.	
5	IF	This pin is DC coupled and should be DC blocked externally using a series capacitor whose value has been chosen to pass the necessary IF frequency range. Any applied DC voltage to this pin will result in die non-function and possible die failure.	
8	RF	This pin is AC coupled and matched to 50 Ohms from 24 - 34 GHz.	
10	Vdd	Power supply for the LO Amplifier.	
11, 12	N/C	No connection required. These pins may be connected to RF/DC ground without affecting performance.

The circuit board used in this application should use RF circuit design techniques. Signal lines should have 50 ohm impedance while the package ground leads and exposed paddle should be connected directly to the ground plane similar to that shown. A sufficient number of via holes should be used to connect the top and bottom ground planes. The evaluation board should be mounted to an appropriate heat sink. The evaluation circuit board shown is available from Hittite upon request.
