

PLIER/CUTTERS

Speciality Electronics Plier

Made from high carbon steel. Accurately machined, these high quality precision tools are designed for fine assembly and adjustment operations on electronic circuits.

Following styles are available with side cutter, flat, round and bent nose, allowing bending setting shaping operations, even in confined areas.

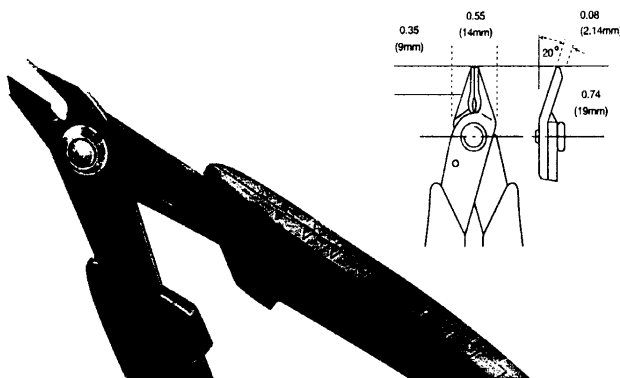

Accurate heat treatment provides the necessary performance and durability.

Conductive Handle

1PK-206

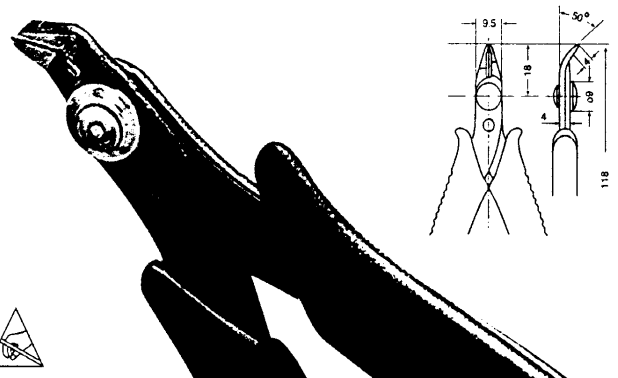

Standard flush cutter

5"(125mm)

1PK-209

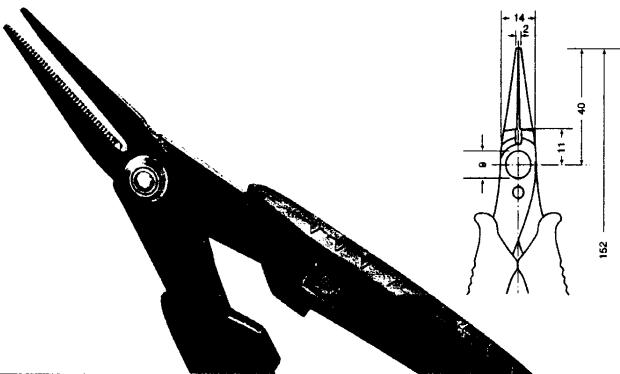

Clean cut micro nipper

A very high precision nipper. The 50° Angulated nose facilitates Working on inclined and difficult planes cutting capacity up to 22AWG.

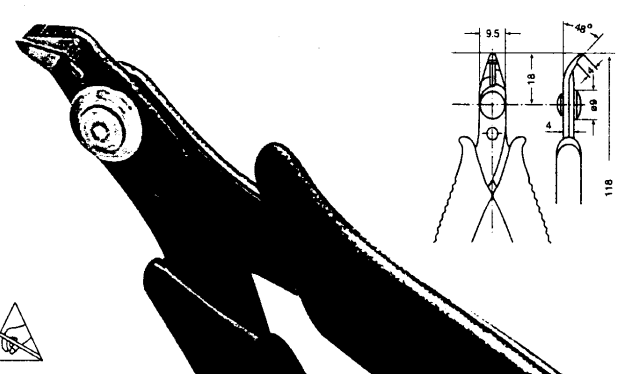

1PK-207

Long nose plier

1PK-210

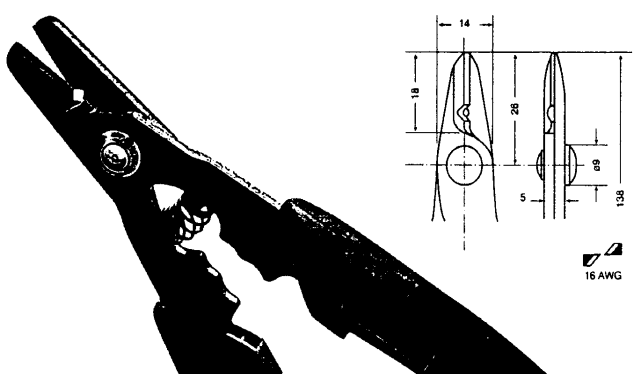

Clean cut micro nipper

This nipper was designed with integrated circuits in mind. It is suitable for closely spaced leads of micro and SMT IC'S. Cutting capacity up to 22AWG.

1PK-208

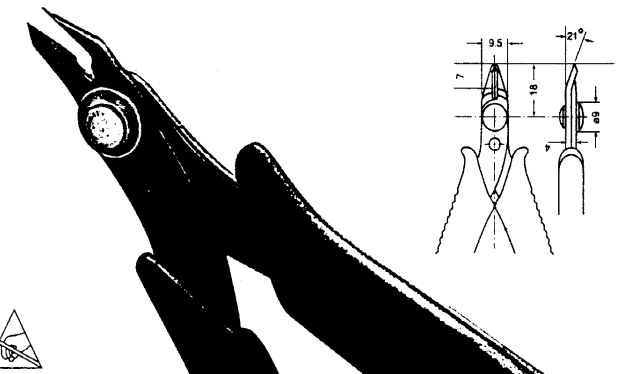

Wire stripper/cutter

It's very good cutting ability. It also has the function of a wire-stripper

1PK-211

Clean cut micro nipper

This nipper was designed for delicate work.
