

# SERIES ANC RESISTORS, TERMINATIONS

## High Power Chip, Aluminum Nitride – 50 & 100 Ohms

### GENERAL INFORMATION

When mounted on an appropriate heat sink, these chip devices provide high power dissipation in terminations and as balancing resistors in Wilkinson power divider networks. Laser trimming provides maximum R.F. power capability. Aluminum nitride is used for those applications where the use and disposal of beryllium oxide is a concern.

### ORDERING INFORMATION

EXAMPLE: Typical Model No.

### NOTE A

Resistance value is expressed using military 4-digit call-out.  
50R0 = 50 ohms  
1000 = 100 ohms  
Other values from 10–500 ohms may be available as special order.  
Contact factory for availability.

### PHYSICAL DIMENSIONS

### GENERAL SPECIFICATIONS

Solderable Terminals	Electroplated Silver over Nickel
Substrate	Aluminum Nitride
Resistive Element	Thin Film

### PERFORMANCE SPECIFICATIONS
