OD-8306N

NEC

1310 nm SMT-LD Module (0.2mW)

OD-8306N is a new surface-mount low cost 1310 nm LD module. This module can achieve stable operation over wide temperature range of -40 to +85°C. An InGaAs PIN monitor photodiode is built in for APC (Automatic Power Control) circuit. This module has detachable pigtail interface and packaged in an 8 pin surface-mount package. Therefore the module can be soldered like an ordinary IC by standard I.R. reflow soldering process.

OD-8306N can be operated at speed up to 622 Mb/s and is especially suitable for the use of the subscriber loop, SONET and FITL.

1. FEATURES

- Surface mountable using I.R. reflow solder
