

DIP Series Miniature 1 Watt DC-DC Converters

T-57-11

FEATURES

- Compact 24-Pin DIP Package
- Low noise, regulated outputs
- Pi Input Filter
- 300V dc isolation
- Short Circuit Protection

GENERAL DESCRIPTION

This family of miniature converters meets the demands of today's densely populated PC boards. Measuring only 1.25" x 0.8" x 0.4", each unit delivers 1 Watt of clean, fully regulated power. These devices are ideal for powering sensitive analog circuits, or in any application where low-power, isolated and regulated outputs are required.

All models include internal Pi-type filters to minimize reflected ripple current. Other features include continuous short-circuit protection with automatic restart, 300V dc isolation, and no derating over the full operating temperature range of -25 to +71 °C.

The converters accept a 5V nominal input, and provide +12V, ±12V, +15V, or ±15V outputs.
