

DESCRIPTION AND RATING

The 6HS8 is a miniature multisection tube that incorporates separate plates and number-3 grids for the two sections together with a common screen, number-1 grid, and cathode. The tube is intended for use as a combined sync-AGC tube in television receivers.

GENERAL

ELECTRICAL

Cathode—Coated Unipotential	
Heater Characteristics and Ratings	
Heater Voltage, AC or DC*	6.3 ± 0.6 Volts
Heater Current†	0.3 Ampere
Direct Interelectrode Capacitances, approximate‡	
Grid-Number 3 to Plate, Each Section	2.0 pf
Grid-Number 1 to All	6.0 pf
Grid-Number 3 (Each Section) to All	3.6 pf
Plate (Each Section) to All	3.0 pf
Grid-Number 3 (Section 1) to Grid-Number 3 (Section 2), maximum	0.015 pf

MECHANICAL

Operating Position—Any
Envelope—T-6½, Glass
Base—E9-1, Small Button 9-Pin

MAXIMUM RATINGS

DESIGN-MAXIMUM VALUES

Plate Voltage, Each Section	300 Volts	Screen Dissipation	0.75 Watt	
Screen Voltage	150 Volts	DC Cathode Current	12 Milliamperes	
Positive DC Grid-Number 3 Voltage, Each Section	3.0 Volts	Heater-Cathode Voltage		
Negative DC Grid-Number 3 Voltage, Each Section	50 Volts	Heater Positive with Respect to Cathode		
Peak Positive Grid-Number 3 Voltage, Each Section	50 Volts	DC Component		100 Volts
Negative DC Grid-Number 1 Voltage	50 Volts	Total DC and Peak		200 Volts
Plate Dissipation, Each Section	1.1 Watts	Heater Negative with Respect to Cathode		
		Total DC and Peak		200 Volts
		Grid-Number 1 Circuit Resistance	0.5 Megohm	
		Grid-Number 3 Circuit Resistance, Each Section	0.5 Megohm	

PHYSICAL DIMENSIONS

EIA 6-3

TERMINAL CONNECTIONS

- Pin 1—Cathode
- Pin 2—Grid Number 2 (Screen) and Internal Shield
- Pin 3—Plate (Section 2)
- Pin 4—Heater
- Pin 5—Heater
- Pin 6—Grid Number 3 (Section 2)
- Pin 7—Grid Number 1
- Pin 8—Plate (Section 1)
- Pin 9—Grid Number 3 (Section 1)

CHARACTERISTICS AND TYPICAL OPERATION

AVERAGE CHARACTERISTICS, BOTH SECTIONS OPERATING

Plate Voltage, Each Section.....	100	100	Volts	Grid-Number 1 Voltage.....	§	§
Screen Voltage.....	67.5	67.5	Volts	Plate Current, Each Section.....	2.0	Milliamperes
Grid-Number 3 Voltage, Each Section.....	-10	0	Volts	Screen Current.....	7.0	4.4 Milliamperes
				Cathode Current.....	7.1	8.5 Milliamperes

AVERAGE CHARACTERISTICS, EACH SECTION SEPARATELY WITH PLATE AND GRID-NUMBER 3 OF OPPOSITE SECTION GROUNDED

Plate Voltage.....	100	100	Volts	Plate Current.....	2.0	Milliamperes
Screen Voltage.....	67.5	67.5	Volts	Grid-Number 3 Voltage, approximate I _b = 100 Microamperes.....	-3.5	Volts
Grid-Number 3 Voltage.....	0	0	Volts	Grid-Number 1 Voltage, approximate I _b = 100 Microamperes.....	-2.3	Volts
Grid-Number 1 Voltage.....	0	§	Volts			
Grid-Number 3 Transcon- ductance.....	450		Micromhos			
Grid-Number 1 Transcon- ductance.....	1100		Micromhos			

* The equipment designer should design the equipment so that heater voltage is centered at the specified bogey value, with heater supply variations restricted to maintain heater voltage within the specified tolerance.

† Heater current of a bogey tube at E_f = 6.3 volts.
‡ Without external shield.
§ With grid current adjusted for 100 microamperes d-c.

Design-Maximum ratings are limiting values of operating and environmental conditions applicable to a bogey electron tube of a specified type as defined by its published data and should not be exceeded under the worst probable conditions.

The tube manufacturer chooses these values to provide acceptable serviceability of the tube, making allowance for the effects of changes in operating conditions due to variations in the characteristics of the tube under consideration.

The equipment manufacturer should design so that initially and throughout life no design-maximum value for the intended service is exceeded with a bogey tube under the worst probable operating conditions with respect to supply-voltage variation, equipment component variation, equipment control adjustment, load variation, signal variation, environmental conditions, and variations in the characteristics of all other electron devices in the equipment.

The tubes and arrangements disclosed herein may be covered by patents of General Electric Company or others. Neither the disclosure of any information herein nor the sale of tubes by General Electric Company conveys any license under patent claims covering combinations of tubes with other devices or ele-

ments. In the absence of an express written agreement to the contrary, General Electric Company assumes no liability for patent infringement arising out of any use of the tubes with other devices or elements by any purchaser of tubes or others.
