

Linear Systems replaces discontinued Intersil IT120A

The LS120A is a monolithic pair of NPN transistors mounted in a single TO-71 package. The monolithic dual chip design reduces parasitics and gives better performance while ensuring extremely tight matching. The LS120A is a direct replacement for discontinued Intersil IT120A.

The hermetically sealed TO-71 is well suited for hi-rel and harsh environment applications.

(See Packaging Information).
