

## FEATURES

- ◆ RoHS compliant
- ◆ Efficiency up to 86%
- ◆ SIP Package
- ◆ Wide temperature performance at full 2 Watt load, -40°C to 85°C
- ◆ UL 94V-0 package material
- ◆ No heatsink required
- ◆ Low ripple and good EMC Features
- ◆ Industry standard pinout
- ◆ Power sharing on output
- ◆ I/O Isolation 1500VDC
- ◆ Short Circuit Protection (automatic recovery)
- ◆ Internal SMD construction
- ◆ External On/Off control
- ◆ 2:1 wide input voltage range

## DESCRIPTION

The WRA\_YS-2W&WRB\_YS-2W series are specially designed for applications where a group of polar power supplies are isolated from the input power supply in a distributed power supply system on a circuit board.

These products apply to:

- 1) where the voltage of the input power supply is wide range (voltage range  $\leq 2:1$ );
- 2) where isolation is necessary between input and output (isolation voltage  $\leq 1500VDC$ );
- 3) where the regulation of the output voltage and the output ripple noise are demanded.

### APPLICATION NOTE

#### SIZE Graph

##### 1) Recommended circuit

If you want to further decrease the input/output ripple, an LC filtering network may be connected to the input and output ends of the DC/DC converter, see (Figure 1). However, the capacitance of the output filter capacitor must be proper. If the capacitance is too big, a startup problem might arise. For every channel of output, provided the safe and reliable operation is ensured, the greatest capacitance of its filter capacitor sees (Table 1). General:

Cin: 5V,12V 100PF  
24V,48V 10uF  
Cout: 47PF(typ.)  
Lin: 4.7PH ~120PH  
Lout:2.2PH ~10PH  
Cs: 10uF ~ 22uF

##### 2) CTRL Terminal

When open or high impedance, the converter work well; When this pin is high; the converter shutdown; It should be note that the input current (Ic) should between 5-10mA, exceeding the maximum 20mA will cause permanence damage to the converter. The value of R Can be derived as follows :

$$R = \frac{V_c - V_d - 1.0}{I_c}$$

##### 3) Input current

While using unstable power source, please ensure the output voltage and ripple voltage do not exceed indexes of the converter. The preceding power source must be able to provide for converter sufficient starting current Ip (Figure 2).

General:  $I_p \leq 1.4 \cdot I_{in-max}$

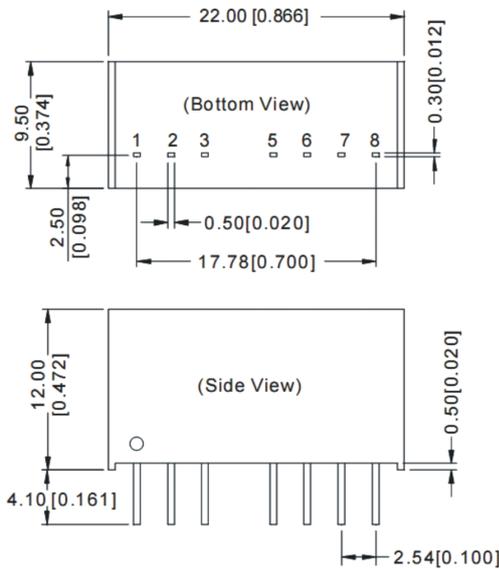

##### 4) No parallel connection or plug and play

Note:

- The load shouldn't be less than 10%, otherwise ripple will increase dramatically.
- Operation under 10% load will not damage the converter; However, they may not meet all specification listed.
- All specifications measured at Ta=25 ° C, humidity<75%, nominal input voltage and rated output load unless otherwise specified.
- In this datasheet, all the test methods of indications are based on corporate standards.
- Only typical models listed, other models may be different, please contact our technical person for more details.

#### RoHS COMPLIANT INFORMATION

This series is compatible with RoHS soldering systems with a peak wave solder temperature of 300° C for 10 seconds.  
 The pin termination finish on the SIP package type is Tin Plate, Hot Dipped over Matte Tin with Nickel Preplate. The DIP types are Matte Tin over Nickel Preplate. Both types in this series are backward compatible with Sn/Pb soldering systems.

#### REACH COMPLIANT INFORMATION

This series has proven that this product does not contain harmful chemicals, it also has harmful chemical substances through the registration, inspection and approval.
