Unit (mm)

Emitting Point

-Emitting Point

 $3 \times \Phi 0.45 \pm 0.1$ 

 $\phi$  2.0 ± 0.2

# Violet Laser Diode for External Cavity

# *NDVA111T*

## **Test Sample**

**Outline Dimension** 

## ■Features

• For External Cavity Laser with Low Reflection Coating on front facet

• Optical Output Power: 45mW

• Can Type:  $\phi$  5.6 mm Cathode Ground

■ Absolute Maximum Ratings

Item	Symbol	Absolute Maximum Ratings	Unit
Optical Output Power	Po	65	mW
LD Forward Current	If	120	mA
LD Reverse Voltage	Vr (LD)	2	V
Storage Temperature	Tstg	-25 ~ 75	°C
Operating Case Temperature	Тс	10 ~ 55	°C

## ■Initial Electrical/Optical Characteristics

 $(Ta=23^{\circ}C *1)$ 

Item		Condition	Symbol	Min	Тур.	Max	Unit
Optical Output Power		CW	Po	-	-	45	mW
Peak Wavelength		Po=45mW	λр	400	-	410	nm
Threshold	Current	CW	Ith	-	50	-	mA
Operating	Current	Po=45mW	Iop	-	72	-	mA
Slope Efficiency		CW	η	-	1.8	-	W/A
Operating Voltage		Po=45mW	Vop	-	4.3	-	V
Beam Divergence*2		Po=45mW	θ//	7	-	12	deg.
			θΤ	15	-	23	deg.
Emission	nt Angle	Po=45mW	Δθ//	-2.0	-	2.0	deg.
Point Accuracy			Δθ⊥	-2.5	-	2.5	deg.

All figures in this specification are measured by Nichia's method and may contain measurement deviations. Diffractive feedback efficiency to the Laser diode must be limited less than 20 % under the External cavity configuration. This model is Test Sample for evaluation or design purpose only. Life time is not guaranteed.

The above specifications are for reference purpose only and subjected to change without prior notice.

## Safety of Laser light

- Laser Light can damege the human eyes and skin. Do not expose the eye or skin to any laser light directly and/or through optical lens. When handling the LDs, wear appropriate safety glasses to prevent laser light, even any reflections from entering to the eye. Focused laser beam through optical instruments will increase the chance of eye hazard.
- These LDs are classified in Class 4 of IEC60825-1 and 21 CFR Part 1040.10 Safety Standards. It is absolutely necessary to take overall safety measures against User's modules, equipment and systems into which Nichia LDs are incorporated and/or integrated.

<sup>\*1</sup> There is some range in ambient temperature.

<sup>\*2</sup> Full angle at 50% from peak intensity

## ■Typical Initial Electrical/Optical Characteristics

## Cautions

## (1) Operating method

- The LD shall change its forward voltage requirement and optical output power according to temperature change. Also, the LD will require more operation current to maintain same output power as it degrades.
- The use of heat sink is strongly recommended to reduce increases in temperature.
- Confirm that electrical spike current generated by switching on and off does not exceed the maximum operating current level specified herein above as absolute max rating. Also, employ appropriate countermeasures to reduce chattering and/or overshooting in the Circuit.

## (2) Static Electricity

• Static electricity or electrical surges will reduce and degrade the reliability of the LDs. It is recommended to use a wrist strap or anti-electrostatic glove when handling the Product.

## (3) Absolute Maximum Rating

• Active layer of LDs shall have high current density and generate high electric field during its operation. In order to prevent excessive damage, the LD must be operated strictly below Absolute Max Rating.

#### (4) Others

- Nichia LDs described in this brochure are intended to be used for ordinary electronic equipment (such as office equipment, communications equipment, measurement instruments and household appliances). Consult Nichia's sales staff in advance for information on the applications in which exceptional quality and reliability are required, particularly when the failure or malfunction of the LDs may directly jeopardize life or health (such as for airplanes, aerospace, submersible repeaters, nuclear reactor control systems, automobiles, traffic control equipment, life support systems and safety devices).
- The Purchaser must acknowledge that any LD can be failed statically and must design its equipments fail safe design. Prior to use of the LD, please confirm that the LD, as described in Nichia's specifications, meets the life expectancy needs of, and provides the features required by the Circuit and any related modules, equipment and/or systems.
- Nichia prohibit Purchaser from reverse engineering, disassembling, or taking any other steps to derive the structure or design of the LD.
- The appearance and specifications of the product may be modified for improvement without notice. The formal specifications must be exchanged and signed by both parties before large volume purchase begins.
- No unauthorized transmission or reproduction of this document, either in whole or in part, is permitted.
