PRODUCT DESCRIPTION

The JPAD5 Series of Low-Leakage Diodes provides a superior alternative to the conventional diode in the case where reverse current must be minimized. The JPAD5 Series leakage current rangings from -5pA to -500pA, to satisfy deferent system requirements.

The JPAD5 Series is available in TO-92 or SOT-23 package to allow end user to maximize circuit performance while maintaining the low cost objectives. ALPHA Semiconductor can supply the part in Tape and Reel upon request.
