## 465 Series Fuse

### Agency Approvals

| AGENCY | AGENCY FILE NUMBER | AMPERE RANGE |
|--------|--------------------|--------------|
|        | NBK030205-E108480B | 1A - 6.3A    |
|        | E184655A,B         | 250mA - 6.3A |

### Electrical Characteristics for Series

| % of Ampere Rating | Opening Time                    |
|--------------------|---------------------------------|
| 125%               | 1 hour, Minimum                 |
| 200%               | 2 minutes, Maximum              |
| 1000%              | 0.01 sec., Min.; 0.1 sec., Max. |

### Description

The Surface Mount Nano<sup>2</sup> 250V UMF product family complies with IEC Publication IEC60127-4-Universal Modular Fuse-Links (UMF). This IEC standard has been accepted by UL/CSA making it the first global fuse standard.

### Features

- Time-Lag
- 250VAC Voltage rating
- Listed to IEC 60127-4, Universal Modular Fuse-Links (UMF), 250V
- RoHS compliant

### Applications

- Power supply
- Industrial equipment
- Lighting system
- Medical equipment
- White goods

### Electrical Specifications by Item

| Ampere Rating (A) | Amp Code | Max Voltage Rating (V) | Interrupting Rating | Nominal Cold Resistance (Ohms) | Nominal Melting I <sup>2</sup> t (A <sup>2</sup> sec) | Agency Approvals |   |
|-------------------|----------|------------------------|---------------------|--------------------------------|---|------------------|---|
|                   |          |                        |                     |                                |   |                  |   |
| 1.00              | 001.     | 250                    | 100 amperes @250VAC | 0.1070                         | 2.8   | x                | x |
| 1.25              | 1.25     | 250                    |                     | 0.0830                         | 5.6   | x                | x |
| 1.60              | 01.6     | 250                    |                     | 0.0560                         | 9.2   | x                | x |
| 2.00              | 002.     | 250                    |                     | 0.0390                         | 14.9  | x                | x |
| 2.50              | 02.5     | 250                    |                     | 0.0260                         | 21.0  | x                | x |
| 3.15              | 3.15     | 250                    |                     | 0.0210                         | 31.7  | x                | x |
| 4.00              | 004.     | 250                    |                     | 0.0160                         | 48.4  | x                | x |
| 5.00              | 005.     | 250                    |                     | 0.0130                         | 87.0  | x                | x |
| 6.30              | 06.3     | 250                    |                     | 0.0088                         | 144.4   | x                | x |

#### Notes:

- I<sup>2</sup>t calculated at 8ms.
- Resistance is measured at 10% of rated current, 25°C
- For information and availability of additional ratings please contact Littelfuse

### Temperature Derating Curve

Note:

- Derating depicted in this curve is in addition to the standard derating of 15% for continuous operation.

### Average Time Current Curves

### Soldering Parameters

|   |                                    |  |
|---|------------------------------------|--|
| Reflow Condition                                      |                                    | Pb – Free assembly                     |
| Pre Heat  | - Temperature Min ( $T_{s(min)}$ ) | 150°C                                  |
|   | - Temperature Max ( $T_{s(max)}$ ) | 200°C                                  |
|   | - Time (Min to Max) ( $t_s$ )      | 60 – 120 secs                          |
| Average ramp up rate (Liquidus Temp ( $T_L$ ) to peak |                                    | 5°C/second max.                        |
| $T_{s(max)}$ to $T_L$ - Ramp-up Rate                  |                                    | 5°C/second max.                        |
| Reflow  | - Temperature ( $T_L$ ) (Liquidus) | 217°C                                  |
|   | - Temperature ( $t_L$ )            | 60 – 90 seconds                        |
| Peak Temperature ( $T_p$ )                            |                                    | 250 <sup>+0/-5</sup> °C                |
| Time within 5°C of actual peak Temperature ( $t_p$ )  |                                    | 20 – 40 seconds                        |
| Ramp-down Rate  |                                    | 5°C/second max.                        |
| Time 25°C to peak Temperature ( $T_p$ )               |                                    | 8 minutes max.                         |
| Do not exceed   |                                    | 260°C                                  |
| Wave Soldering Parameters                             |                                    | 260°C Peak Temperature, 3 seconds max. |
