

Nevada Western® O.M.N.I. Connectors, Couplers and Adapters

13

Nevada Western O.M.N.I. connectors allow a variety of cable and connector types to be installed into O.M.N.I. patch panels and information outlets. Connectors are easily terminated in the field without special tools. O.M.N.I. 6-position and 8-position jacks and plugs can be wired to NWS 1000, 2000, 7000, 8000 and 9000 series systems. Accommodates any wiring scheme.

Connectors include 6-position and 8-position jacks (standard, keyed, looping and with shorting bars) for UTP cable, BNC connectors, SMA/ST connectors, and F connectors.

Features and Benefits

- Mounting options—information outlets, receptacle adapters, and patch panels for all connectors
- Combed contacts — prevent shorting
- Twist-on coax connectors—eliminate costly installation tools
- 50 micro-inches of gold
