Glass Encapsulated Chip Thermistors

Honeywell Glass Encapsulated Chip Thermistors are a high quality line of low-cost, hermetically sealed, glass-encapsulated units that evolved from the highly successful and field-proven Honeywell Standard Chip Series. Added to the feature of "true low cost' is "delivery from stock" in high volume. They are designed to cover the full temperature range of -60 °C to 300 °C. The

uniform dimensions are ideally suited for automated assembly. This rugged sensor is designed for any application which demands reliability at a low cost. The tinned copper-clad steel leads are both solderable and weldable. The leads may be formed/cut for radial lead applications. Glass Encapsulated Chip Thermistors are available to our customers bulk packaged or on tape and reel.

Features

- Low cost
- Rugged DO-35 glass encapsulation
- High temp. capability (300 °C)
- Delivery from stock
- ldeal for highly automated assembly
- Also available on tape and reel
- _ D.C. 2.5mW/°C in still air min.
- _ T.C. 4 s in still air max.
